

FY2025

CMAP proposed UWP budget

Chicago Metropolitan
Agency for Planning

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

The Metropolitan Planning Organization (MPO) Policy Committee was formed in 1955 to develop the first comprehensive long range transportation plan for northeastern Illinois. In 1981, the Illinois governor and northeastern Illinois local officials [designated](#) the MPO Policy Committee as the metropolitan planning organization for the region.

The Chicago Metropolitan Agency for Planning (CMAP) provides staff support to carry out the transportation planning and programming activities described in this Unified Work Program (UWP). CMAP — together with its many transportation, transit, and local community partners — has been tasked with collaborating to plan, develop, and maintain an affordable, safe, and efficient transportation system for the region. The Policy Committee provides the forum through which local decision makers develop and implement regional plans and programs.

This document was prepared by CMAP and is sponsored by the agencies on the MPO Policy Committee. The report has been funded by the U.S. Department of Transportation, the Federal Highway Administration, and the Federal Transit Administration, and authorized by the State of Illinois.

CMAP is directed by the State of Illinois to conduct a wide variety of community and land use planning functions on behalf of the seven counties in northeastern Illinois. Due to the interconnected nature of transportation, transit, community, and land use planning, it is critically important that this work be conducted in tandem, and each be informed by the other. This allows changes to the region's systems to be considered collectively and helps to optimize investment and outcomes. To do this work, the agency uses UWP funds complemented by a diverse set of other funding sources, including grants and local dues. The complete outline of CMAP's annual services is included in the [FY2025 CMAP budget and regional work plan](#), which is a companion document to the UWP.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Section I: Executive summary

Introduction

The Chicago Metropolitan Agency for Planning (CMAP) derives its primary funding from the Unified Work Program (UWP) that supports transportation planning in northeastern Illinois, with metropolitan planning funds from the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA), in addition to state and local sources. Federal dollars require a 20 percent non-federal match. The UWP funds are allocated for operating activities and contractual services. The Illinois Department of Transportation (IDOT) requires the operating funds (3-C Operations Grant) be expended during the fiscal year (July 1, 2024, to June 30, 2025).

This UWP was developed by staff in accordance with [23 CFR § 450.308](#), the IDOT Metropolitan Planning Organization [Cooperative Operations Manual](#), and the UWP [development methodology](#) established by CMAP's UWP Committee in October 2023. The UWP Committee consists of eight voting members who represent the City of Chicago, CTA, Metra, Pace, CMAP, RTA, the Regional Council of Mayors, and the counties. IDOT chairs the committee and votes only in instances of ties. Non-voting members include FHWA and FTA, and a currently vacant position for the Illinois Environmental Protection Agency.

The UWP has two components: the core planning activities necessary to meet federal metropolitan planning requirements and other transportation planning activities, such as planning for safe and complete streets, and conducting subregional and project-specific studies that support federal planning factors, state planning efforts, and the region's strategic goals. Most of the core annual metropolitan transportation planning work is performed by CMAP staff. However, due to the size and complexity of the CMAP region, and long-standing working relationships with partner agencies, CMAP relies on those partners to complete a modest portion of the work. Other transportation planning activities are carried out by partner agencies through the competitive call for transportation planning projects.

The program continues to focus on the implementation of three major pieces of legislation: the Clean Air Act Amendments of 1990; the Americans with Disabilities Act; and the Infrastructure Investment and Jobs Act. CMAP's [Strategic Direction](#) for advancing the recommendations of [ON TO 2050](#) also guides the prioritization of planning activities.

The staff developed UWP was reviewed by the UWP Committee on February 7, 2024, and forwarded to the CMAP Transportation Committee for consideration on March 1, 2024. The CMAP Board reviewed the UWP as part of CMAP's comprehensive budget, which was approved on February 14, 2024. The MPO Policy Committee will consider approval of the UWP on March 14, 2024.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

FY2025 Funding summary

The FY25 UWP budget totals \$34,330,783. This includes \$27,464,626 in FHWA and FTA metropolitan planning funds and \$6,866,157 in state and local matching funds. It is anticipated that the State of Illinois will pass a budget for FY25 that includes this funding.

Core planning activities make up 98% of the proposed budget, with other transportation planning activities identified through the competitive program filling the remaining 2% of the program. Figure 1 below illustrates the share of funding by major activity.

FY25 UWP funds will be allocated to CMAP, CTA, the City of Chicago, the Subregional Councils of Mayors, Metra, Pace, and DuPage County for core and competitive transportation planning activities. Figure 2 below summarizes the allocation of funding by agency. Funding allocations include both personnel costs and expenses, including consulting services. Figures 3 and 4 illustrate the relative personnel and expense costs by activity and agency, respectively.

Figure 4. Personnel vs. expense costs, by agency

Safe and accessible transportation options

The Infrastructure Investment and Jobs Act (§ 11206) requires MPOs to spend not less than 2.5% of federal metropolitan planning funds apportioned to them annually, to carry out activities to increase safe and accessible options for multiple travel modes for people of all ages and abilities. These activities are primarily accomplished through the competitive program. For FY2025, \$858,270 must be allocated for these activities. Within the competitive program, \$563,490 is programmed for these activities. Within CMAP's Metropolitan Transportation Plan (MTP) core program, there is more than \$800,000 budgeted for the Accessibility Program Area, the I-290 Blue Line Corridor, the Plan of Action for Regional Transit, and the Safe Travel for All Roadmap. All these programs contribute to increasing safe and accessible options within the region.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Section II: FY2025 Core program

Introduction

As the Metropolitan Planning Organization (MPO) for the Northeast Illinois region, CMAP must carry out certain planning activities and produce specific work products. This work is carried out primarily by CMAP staff, but some core program functions are also performed by eligible partner agencies: the Chicago Department of Transportation (CDOT), the seven counties within the CMAP planning area (Cook, DuPage, Kane, Kendall, Lake, McHenry, and Will), the eleven subregional Councils of Mayors (Central, DuPage, Kane/Kendall, Lake, McHenry, North Central, North Shore, Northwest, South, Southwest, and Will), the Regional Transportation Authority (RTA), and the three transit service boards (CTA, Metra, and Pace). The core program is for ongoing work, not for one-time studies or projects. Occasionally, consultant support may be needed to complete core program work; however, the majority should be completed by staff. Administrative support staff, commodities, professional services, and general operating costs for the MPO are provided by CMAP and are a part of the overall core program budget.

The core program consists of six major activities. The overall budget for those activities is provided below, followed by details of each activity. More detailed budgets, including personnel and expenses by task within each activity are documented in Appendix H.

Table 1. FY25 core budget by activity

	Personnel	Expenses	Total	Federal (80%)	Match (20%)
Transportation Improvement Program	\$3,404	\$634	\$4,038	\$3,230	\$808
Metropolitan Transportation Plan	\$5,083	\$4,373	\$9,456	\$7,565	\$1,891
Congestion Management Process	\$152	\$515	\$667	\$534	\$133
Performance Monitoring	\$477	\$20	\$497	\$398	\$99
Public Participation	\$1,402	\$222	\$1,625	\$1,300	\$325
Operational Expenses	\$9,047	\$8,437	\$17,485	\$13,988	\$3,497
GRAND TOTAL	\$19,566	\$14,201	\$33,767	\$27,014	\$6,753

All figures in thousands of dollars

Transportation Improvement Program (TIP)

The work performed in this category helps create and maintain a prioritized, fiscally constrained transportation improvement program for northeastern Illinois, which is consistent with the metropolitan transportation plan (currently ON TO 2050), functional plans, and federal rules. Major tasks within the category include: developing and documenting the transportation programming process; implementing the process through the development, monitoring, and updating of the fiscally constrained project listing, utilizing the eTIP database; and reporting on the accomplishments, including the annual obligation of federal funds. This category also

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

includes the direct programming of certain federal fund sources and participating in, monitoring, and reporting on project implementation progress.

Major deliverables

Description	Responsible agencies	Schedule
Project status updates	All	Quarterly
TIP amendments and modifications, including conformity analyses	All	Ongoing and according to CMAP's Master Transportation Schedule and the IDOT Region 1 Letting Schedule
Federal coordination materials, including project funding documents	CDOT, Councils of Mayors	Ongoing
eTIP database	CMAP	Ongoing
TIP programmer resource documents and web pages	CMAP	As needed
TIP training	CMAP	Delivered by CMAP to all partner agencies as needed
Federal fund source programs, including call for projects materials, funding applications, project selection methodologies, and program management resources and documents	CMAP, CDOT, Councils of Mayors	Annual (even years: regional programs; odd years: local programs)
Summaries of meetings, conferences, trainings, procedural changes, new or updated regulations, and other appropriate information for distribution to council members and interested parties in newsletters and/or emails	Councils of Mayors	Ongoing
Annual and 5-year capital programs, including FTA formula programs	CTA, Metra, Pace	Annual

State Fiscal Year (July 1, 2024 – June 30, 2025)

Metropolitan Transportation Plan

The work performed in this category comprises the planning, research, data collection, modeling, analysis, and regional coordination required to develop, evaluate, update, and implement the region's long-range metropolitan transportation plan. Other planning work that implements the broader regional comprehensive plan and addresses the federal planning factors in [Title 23 § 450.306](#) — such as increasing the safety, security, resiliency, or reliability of the transportation system; supporting the economic vitality of the region, and protecting and enhancing the environment; promoting energy conservation; improving the quality of life; and promoting consistency between transportation improvements and state and local planned growth, housing, and economic development patterns — is also included in this category. Local technical assistance is provided to transit partners, counties, and municipal partners within this category.

Major deliverables

Description	Responsible agencies	Schedule
Planning study/technical analysis reports	CDOT	As needed
2025 Priority project booklet	CMAQ	Ongoing
2026 Regional Transportation Plan	CMAQ	Ongoing

MTP Total	33	\$5,083	\$4,373	\$9,456	\$7,565	\$1,891

All figures in thousands of dollars

Congestion management process

The work performed in this category defines the congestion management process (CMP) that provides for safe and effective integrated management and operation of the multimodal transportation system, through the use of travel demand reduction, job access projects, and operational management strategies. The CMP describes an ongoing, systematic method of managing congestion that provides information about both system performance and potential alternatives for solving congestion-related problems.

Major deliverables

Description	Responsible agencies	Schedule
Congestion management process update	CMAP	Ongoing
Travel Time Index geodatabase	DuPage DOT	Q1 through Q2
Travel Time Index spreadsheet(s)	DuPage DOT	Q1 through Q2
CMP data	Metra	As needed
Shared mobility program administration	Pace	Ongoing
Shared mobility program development: employer outreach	Pace	Q1

CMP Total	1	\$152	\$515	\$667	\$534	\$133

All figures in thousands of dollars

Performance monitoring

The work performed in this category allows the MPO to collect and analyze the data necessary to establish targets for the measures established under 23 CFR part 490, 49 U.S.C. 5326(c) and 49 U.S.C. 5329(d), to track progress toward achieving the targets, to consider capital programming and policy implications and alignment for achieving the targets, and to report on that progress, including providing a system performance report as part of the MTP.

Major deliverables

Description	Responsible agencies	Schedule
Performance targets	CMAP	Ongoing
Pavement Condition Rating System geodatabase	DuPage DOT	Biennially
Pavement Condition Rating System spreadsheet(s)	DuPage DOT	Biennially
Data or information, such as asset condition, facility use, ridership, etc.	Metra	Upon request by CMAP
Pace Bus Transit Asset Management Plan program administration	Pace	Ongoing

All figures in thousands of dollars

Public participation

All MPO activities must be conducted in an open and transparent manner, and the public must be able to easily participate in the MPO's planning activities. To ensure that this occurs, the MPO must develop and implement a public participation plan that defines the process for providing individuals, affected public agencies, and other interested parties with reasonable opportunities to be involved.

Major deliverables

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Section III: FY2025-2029 Competitive program

Introduction

In addition to the core planning activities and work products, CMAP and its partners may also complete one-time planning studies or activities that support, implement, inform, and/or complement the MPO's required work, and are aligned with CMAP's Strategic Direction and federal planning factors but are not ongoing core activities. These activities are funded through a competitive program.

Beginning with development of the FY2025 UWP, CMAP is committed to developing a multiyear program of transportation planning projects. Multiyear programming has been successful for programming implementation projects for many years and helps agencies better prepare to start work on time. Multiyear programming also provides a mechanism for spreading project costs across multiple UWP years, better matching the actual schedule of work and expenditure of funds. Although funds programmed in out years is contingent on annual funding availability, CMAP has committed to allocating no less than \$1 million per year to the competitive program. This includes 2.5% of the region's annual metropolitan planning funds, which will be programmed only for activities to increase safe and accessible options for multiple travel modes for people of all ages and abilities.

During the call for FY2025-2029 competitive projects, only four applications were received. Three of the four applications included requests for funding to be programmed in FY2025. All projects are recommended for funding, as summarized below. Descriptions of the projects follow the funding summary.

Table 2. Recommended FY2025-2029 UWP Competitive Program

			Recommended by FY				
Sponsor	Project	Total Cost	FY25	FY26	FY27	FY28	FY29
CTA	I-290/Blue Line Corridor Program (PMO Funding)	\$750	\$250	\$500	\$0	\$0	\$0

Total			\$563	\$1,069	\$242	\$0	\$0
Federal (80%)			\$451	\$855	\$193	\$0	\$0
Sponsor Match (20%)			\$113	\$214	\$48	\$0	\$0

All figures in thousands of dollars

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

CTA: I-290/Blue Line Corridor Program (PMO Funding)

To successfully and efficiently leverage the reconstruction of the Blue Line Forest Park Branch and the I-290 interstate, which lie in the same transportation corridor footprint, the jurisdictional authorities for the facilities and right of way are creating a partnership to address the safety, mobility, and condition of the corridor. CMAP, alongside CTA and IDOT, are proposing to utilize a Program Management Office (PMO) to provide critical technical support for project sequencing, financing, coordination, and public engagement. The requested UWP funding will provide for CTA's funding contribution towards the PMO office.

Proposed schedule

Procurement: 01/01/2024 - 05/31/2024
Completion of Work: 07/01/2024 - 06/30/2025

DuPage County: Bicycle and Pedestrian Plan (Public Involvement and Existing Conditions)

DuPage County DOT will utilize the assistance of a consulting firm that specializes in public engagement to complete an existing conditions report, and to develop and execute a public engagement plan for the DuPage County Bicycle and Pedestrian Plan. This is the first phase of planning that will focus on the expansion and enhancement of DuPage DOT's network, implementing DuPage Safety Action Plan recommendations and providing access to jobs and recreational amenities for disconnected communities in DuPage County.

Proposed schedule

Metra: Origin/Destination Survey

Metra's mode-of-station-access, mode-of-station-egress, origin, and destination data is used to more accurately predict future ridership and access needs for each station on new and upgrade rail line projects throughout the region. The data will build on previous surveys conducted in 2019, 2016, 2014, 2006, 2002, and earlier, and will inform Metra on post-COVID ridership trends, trip purposes, and travel patterns throughout the region. The survey data will also identify the usage of different ticket types for FTA Title VI Reporting purposes.

Project deliverables

Deliverable name	Partners that will also use this deliverable	How CMAP can use this deliverable	How partners can use this deliverable
Survey Questionnaire	CMAP, RTA, CTA, Pace, municipalities, COGS, counties	CMAP can use the questionnaire to understand Metra's objectives and provide feedback that will be reviewed when considering schedule and service revisions.	Partners will be able to understand what Metra is inquiring about from riders and provide feedback to Metra about what to ask and use questions to inform their own data collection and decision making.
Survey Methodology	CMAP, RTA	CMAP can use this methodology to understand Metra's data collection process and incorporate the study's findings into its own research.	The methodology will inform future data collections done by Metra, RTA, and CMAP for understanding how and when people move through our region and utilize transit.
Tabulated Survey Data	CMAP, RTA, CTA, Pace, municipalities, COGS, counties	CMAP can use this data for making recommendations for regional transit action, housing policy, and agency collaborative action.	The survey data will help partners understand travel demand at local Metra stations and incorporate updated ridership data into future transportation plans. The data will also provide an understanding of travel patterns and demand at and near Metra stations.
Analysis of Survey Data	CMAP, RTA, CTA, Pace, municipalities, COGS, counties	CMAP can use the analysis to understand Metra's conclusions and make recommendations for future studies and analyses.	The data will help service boards plan for transfer service during transfer-heavy periods, and incorporate updated ridership data into future transportation plans. The data will also inform TOD policies for municipal governments.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Metra: Targeted Station Ridership Counts

The project will collect ridership counts at approximately 30 select Metra stations, using mobile phone counting sensors or cameras on train platforms. Devices will be set up at high ridership stations, including major destinations such as concerts, sporting events, and festivals that stress the transportation system and provide time of day estimates of station ridership. Project results will inform ridership demand, validate other station ridership sources, and serve as a proof of concept for emerging and innovative passenger count solutions Metra identified from responses to a 2023 request for information.

Appendix A: Local match sources

The agencies participating in the UWP must provide a non-federal match for the federal metropolitan planning funds equal to a specific percentage of the federal money. All federal funds are granted on an 80 percent federal, 20 percent local basis. Each participating agency is responsible for providing the local match. The sources of the local match for the participating agencies are as follows:

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

CMAP

IDOT provides funding through state transportation funds and CMAP collects local dues from municipalities, counties, and partner agencies.

CTA, Metra, and Pace

The match is provided by local government funds.

City of Chicago

The match is provided by local government funds.

Counties

The match is provided by local government funds.

Councils of Mayors

The match is provided by the recipient agency using local government funds or direct cash contributions.

**Proposed FY2025 Unified Work Program (UWP)
for Northeastern Illinois**

State Fiscal Year (July 1, 2024 – June 30, 2025)

Appendix B: Civil rights and environmental justice requirements

The Federal Highway Administration and the Federal Transit Administration, in conformance with Title VI of the Civil Rights Acts of 1964, require that FHWA and FTA planning grant applicants meet certain standards of compliance with Title VI. There are requirements for Equal Employment Opportunity (EEO) programs, Disadvantaged Business Enterprise (DBE) programs, and general compliance with Title VI and Executive Order 12898 (Environmental Justice) in the transportation planning and programming process. The status of compliance of the recipient agencies in the three areas of civil rights activities is described in this appendix. In addition, strategies to meet Executive Order 12898 and USDOT order 5610.2 (a) are described.

Equal Employment Opportunity

The Metra Equal Employment Opportunity Plan and Program was submitted to and approved by FTA in April 2010. Metra's EEO plan and September 2013 policy updates are on file with the EEO/Diversity Initiatives Department.

Pace Suburban Bus - The 2019 – 2023 EEO Program Plan is the most recent version. Pace also submitted 2022, 2021 and 2020 EEO-1 Component 1 Data Collection Reports to the EEOC.

CMAP is committed to a policy of providing equal employment opportunity and of ensuring non-discrimination in the conduct of all its activities. CMAP has established an affirmative action program, which calls for efforts to have the staffing of CMAP at all levels be representative of the make-up of the region's workforce.

The CTA's current EEO Program Plan (March 1, 2020- February 29, 2024) was submitted to FTA on June 17, 2020. The current program's expiration date is April 30, 2024.

The latest updated EEO plan covering all City of Chicago departments was submitted to the FTA in January of 2004. The FTA has informed the city that they no longer need to submit the plan.

Disadvantaged Business Enterprise

The United States Department of Transportation (USDOT) has developed a Disadvantaged Business Enterprise (DBE) program for grant recipients and contractors pursuant to 49 CFR Part 26.

The Commuter Rail Division of the Regional Transportation Authority (Metra) is a grantee of USDOT and is firmly committed to a policy of non-discrimination in the conduct of its business, including the procurement of goods and services. Metra originally adopted a comprehensive DBE policy by ordinance in 1984 (CRB 84-42) and adopted revised DBE policies in 1989 (MET 89-5) and 1999 (MET 99-15). With the revised federal DBE regulations, Metra submitted an update to its August 1999 DBE program in May 2012. Metra submitted its overall goal in August 2013.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Pace Suburban Bus is committed to a policy of nondiscrimination, recognizing its responsibilities to the communities it services. Pace reaffirms that commitment through the operation of its Disadvantaged Business Enterprise (DBE) program. Pace submitted its FFY 2022 – 2024 triennial DBE goal to the FTA in September 2021. Pace's DBE program was recently updated in January 2023.

CMAP is committed to taking positive steps in its purchasing practices to assure the use of disadvantaged business enterprises.

The CTA submitted its FY2022-FY2024 DBE goal on August 1, 2021. Also, the CTA is a participant in the Illinois Unified Certification Program (ILUCP) which provides one-stop shopping in the state for DBE certification.

The ILUCP has successfully been implemented as of September 1, 2003. The primary DBE certifying agencies consist of the CTA, Metra, Pace, the City of Chicago, and the Illinois Department of Transportation (IDOT). In addition, 19 subscriptions with the State of Illinois have agreed to only use ILUCP DBE firms on federally funded projects when applicable.

The City of Chicago DBE program was last updated in 2013, and the most recent triennial review, conducted by the FTA in 2016, found the city to follow civil rights laws.

Title VI documentation

This material documents the compliance of CMAP with FTA Circular 4702.1B (TITLE VI REQUIREMENTS AND GUIDELINES FOR FEDERAL TRANSIT ADMINISTRATION RECIPIENTS) dated October 1, 2012.

CMAP's Title VI program is on its website at <https://www.cmap.illinois.gov/contact/title-vi>. The program was adopted by the CMAP Board and MPO Policy Committee in June 2017.

The certification review of CMAP completed by FHWA and FTA in 2022 found the agency to follow civil rights requirements.

The Title VI general requirements are included in the [Title VI Program](#) on the CMAP website. Requirements documented in the program include:

- a. Notice to beneficiaries
- b. Complaint procedures
- c. Public transportation-related Title VI investigations, complaints, or lawsuits
- d. Aiding sub-recipients
- e. Monitoring sub-recipients
- f. Determination of site or location of facilities

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Some of the general requirements are updated more frequently than the program document; these are described below.

- a. **Public Participation Plan:** CMAP's [Public Participation Plan](#) was adopted in January 2024 and is available on the CMAP [website](#).

The [Public Participation Plan](#) guides CMAP's proactive public engagement of the residents and constituencies of northeastern Illinois to plan a multi-modal transportation system that meets the region's transportation, economic, and climate goals. Federal guidelines require the participation of interested parties in the development of transportation plans. Under those guidelines, Metropolitan Planning Organizations (MPO) must have a Public Participation Plan that guides engagement efforts. This Plan is intended to be responsive to the region's varied constituencies, to ensure that the agency's plans reflect the priorities of the region's residents.

The Public Participation Plan:

- Establishes core principles for public engagement.
- Explains how CMAP integrates meaningful public participation into its activities.
- Outlines the agency's strategies and communications and engagement methods and channels for broadening and deepening public engagement in its planning processes, including engagement of residents in historically marginalized communities.
- Provides residents with the guidance and information necessary to participate in and influence regional policy development and decision-making processes.
- Serves as a resource and guide for CMAP staff to plan their public engagement processes, highlighting best practices and exploring new tools and innovative practices to ensure the agency's plans reflect the priorities of the region's residents.

CMAP's public engagement initiatives include a public committee structure, comprehensive public information functions (website, newsletters, social media), and myriad tools and methods for meeting constituencies where they are.

CMAP newsletters are emailed regularly and available online and inform readers of progress at CMAP and events, announcements, and other news from throughout the region. CMAP also connects through various social media ([Facebook](#), [Twitter](#), [Instagram](#), and [YouTube](#)). CMAP's Public Participation Plan, adopted in January 2024, and its accessibility policies ensure access to the agency's meetings and planning processes. CMAP provides translation assistance to people with limited English proficiency and document translation as needed.

- b. **Racial breakdown of the membership of committees, and a description of efforts made to encourage the participation of minorities on such committees:** Five boards

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

and committees at CMAP consider transit-related issues during their normal deliberations: the CMAP Board, the MPO Policy Committee, the Council of Mayors Executive Committee, the Transportation Committee, and the CMAQ Project Selection Committee. Other committees and working groups may consider transit-related issues on an incidental basis. Membership on these committees is specified in statutes or bylaws, in that the members are appointed to represent agencies or parts of the region. The members are appointed by others, so CMAP has no control over the appointments. The composition of these boards and committees is:

- a. CMAP Board: 13 non-minority, 2 minority; 1 voting and 1 non-voting are vacant
- b. MPO Policy Committee: 14 non-minority, 6 minority
- c. Council of Mayors Executive Committee: 20 non-minority, 2 minority
- d. Transportation Committee: 25 non-minority, 4 minority
- e. CMAQ and TAP-L Project Selection Committee: 7 non-minority
- f. STP Project Selection Committee: 7 non-minority

CMAP's compliance with the MPO requirements contained in Chapter VI of Circular 4702.1B is documented in the [Title VI Program](#). These requirements include:

- a. Demographic profile
- b. Procedures to address mobility needs of minority populations
- c. Demographic maps and charts
- d. An analysis of impacts of the distribution of state and federal funds
- e. Procedures to pass through FTA financial assistance
- f. Procedures used to aid potential sub-recipients
- g. Monitoring sub recipients

The procedures to address mobility needs of minority populations are updated more frequently than the program document; these are described below.

- c. **Procedures to address mobility needs of minority populations:** The mobility needs of minority populations were identified and considered in the GO TO 2040 plan and update, adopted in October 2014. The procedures are described in more detail in the [Title VI Program](#), the analysis in [GO TO 2040 Plan Update](#), and the analysis in [ON TO 2050](#).

**Proposed FY2025 Unified Work Program (UWP)
for Northeastern Illinois**

State Fiscal Year (July 1, 2024 – June 30, 2025)

Appendix C: Staff requirement summary table

Each work element description in the UWP contains an estimate of the number of hours required for the completion of the work and the number of full-time equivalent (FTE) persons are represented by those hours. The table below summarizes these figures by recipient agency. All participating agencies anticipate having adequate staff available during the year to perform the assigned work.

Agency	Total staff hours	FTE
CDOT	5,453	2.8
CMAP	226,999	116.4
Council of Mayors	30,863	15.3
CTA	9,133	4.4
DuPage DOT	616	0.3
Metra	7,576	3.6
Pace	4,142	2.0

**Proposed FY2025 Unified Work Program (UWP)
for Northeastern Illinois**

State Fiscal Year (July 1, 2024 – June 30, 2025)

Appendix D: Audit requirements

In response to the requirements of the Office of Management and Budget’s “Super Circular” (2 CFR 200), the participating agencies all have decided for required financial and compliance audits within the prescribed audit reporting cycle. It is understood that failure to furnish an acceptable audit as determined by the appropriate federal agency may be a basis for denial and/or refunding of federal funds.

Agency: *Chicago Department of Transportation*

Name of Project: Complex Intersections Framework Plan

Description of Planning Work: This study will create a framework plan that identifies, classifies, prioritizes, and develops improvement concepts for the universe of relevant complex intersection (five, six, or more legs and highly acute/obtuse angles) locations throughout the city. For each intersection, the study will describe the existing complexities, modes affected, and potential benefits of modifications and generate detailed concept plans for improvements that would address these issues. These plans will reflect guidance from CDOT's Complete Streets guidelines, Vision Zero Plan, and other related resources while acknowledging existing and potential future nearby land use which drives travel demand and modal orientation. It is expected that the universe of intersections studied will total approximately 100 with about half needing low impact/near term treatments (pavement marking/signage/signal timing/cost estimates), a quarter needing medium impact/mid-term treatments (above plus curb line changes/signal modernization), and a quarter needing high impact/longer term treatments (above plus street realignment/property acquisition).

The study will also reflect lessons learned from other recent complex intersection improvement projects in Chicago - (five projects have recently been completed and five more are currently being addressed) and document how intersections were identified and how priorities, concepts, and strategies for each intersection were determined. Community engagement will be incorporated at a level appropriate for conceptual design, primarily involving local elected officials (i.e., affected Aldermen) and key community organizations as needed.

The budget for this study anticipates the preparation of general concept plans for improvements to every intersection in the universe of relevant intersections as well as more detailed concept plans for those intersections identified as highest priority (approx. 1/3 of the total). The general concept plans would support planning level decision-making and the detailed concept plans would allow priority intersections to advance faster into engineering design.

Resulting product: Project report

The cost of the work: \$1,500,000

Source(s) of funds: SPR and other state funding

Name of Project: Chicago River Edge Access Study

Description of Planning Work

: The “Our Great Rivers” Vision Plan (2016) calls for a “network of continuous river trails” across Chicago and “easy access from all neighborhoods.” While recent efforts (Chicago River Edge Ideas Lab, Chicago River Design guidelines update, South Branch Riverwalk Implementation Plan) have considered the design of specific elements or physical segments to these facilities, what is missing is an up-to-date inventory, overview, and categorization of current river edge conditions for active transportation access to and along the rivers’ edges and status of improvements.

In some locations this study will identify facilities that already exist, or are pending implementation, or will be the responsibility of private property owners under the River Design guidelines. However, the study will primarily compile and analyze the other locations where public investment will still be needed (such as under bridge connectors, bridges, and path modernization to transportation facility standards). This will lead to a recommended program of sites for future, locally oriented planning, or design studies. In locations where current uses preclude direct river access, the study may also recommend alternate facilities along roadways or other nearby corridors.

This project is modeled after CDOT’s South Lakefront Access Study (2003) which conducted similar analysis that led to investments in new bridges to the Lakefront at 35th and 41st Streets. The study would also succeed certain elements of the Chicago Trails Plan (2009) related to river trails and inform future updates to the CMAP Trails and Greenways Plan. The Trails Committee of the City’s new River Ecology and Governance Group will be an important resource in the development of the study.

Resulting product: Project report, including data, presentations, and recommendations.

Performing the work: Work will be done through a consultant team with supervision from CDOT and assistance from DPD.

Time frame for completing the work: 4th Quarter 2024

The cost of the work: \$200,000

Source(s) of funds: SPR

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of Project: Vision Zero Northwest Side

Description of Planning Work: This work will build on the previous outreach process in the Vision Zero West Side project to better refine outreach strategies for creating a Local Road Safety Plan - one of FHWA's newest proven safety countermeasures. It will advance the safe systems/Vision Zero approach to road safety in Chicago by marrying both the community lived expertise with the learned experience of project staff to result in a road safety plan based in reality and owned equally by the community and the city.

CDOT will conduct a community-led design process to ensure that key members of each neighborhood are actively engaged in the creation, selection, and piloting of new ideas. This program will expand on the lessons learned from the Vision Zero West Side outreach program and combine the knowledge and expertise of CDOT staff with Greater Good Studio, a human-centered design firm focused on social impact.

This outreach process will build the capacity of communities to solve old problems in new ways and create a model for other communities to learn from and replicate. This approach will help these communities to:

- Build local capacity by recruiting a local design team (LDT)
- Understand current opportunities, challenges, and behaviors of the community through in-context, on-site research, and leveraging events and locations already frequented by the community
- Convene and facilitate a drop-in visioning session with the LDT, community members, road safety advocates to share research findings and generate new road safety ideas in response
- Convene and facilitate a drop-in community choice session with the LDT, community members, road safety advocates to narrow and select new road safety ideas
- Present final selected ideas to CDOT and aid the testing of 1-2 ideas in each neighborhood through pilots implemented by CDOT

Resulting product: Project report, including data, presentations, and recommendations.

Performing the work: Work will be done through a consultant team with supervision from CDOT.

Time frame for completing the work: 2nd Quarter 2023

The cost of the work: \$250,000

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of Project: Vision Zero South Side

Description of Planning Work: Vision Zero is Chicago’s initiative to eliminate fatal and serious injury traffic crashes by the year 2026. A multi-departmental Vision Zero steering committee led by the Mayor’s Office and four working groups have identified goals and strategies to increase traffic safety with a three-year Vision Zero Chicago Action Plan released in June 2017. This data-driven process established City priorities and identified the resources – and gaps in resources – to meet benchmark reduction goals for fatalities and serious injuries by 2020.

The Vision Zero South Side program will operate to: Build community members’ ownership of and influence on traffic safety; Coordinate open dialog and community-focused problem solving; Encourage and facilitate the participation of all community members; Inspire community action through public outreach and encouragement; Provide educational resources and tools tailored to the South Side community, including both online and physical resources; Host accessible, informative, and enjoyable outreach and encouragement events and attend events within the community; Ensure that all hosted events include child and youth-focused activities; Unite disconnected agencies and organizations to increase understanding and awareness and to influence positive behavioral change; and improve the relationship between community members and City agencies.

Resulting product: Community engagement and Action Plan

Performing the work: Staff

Time frame for completing the work: 1st Quarter 2023

The cost of the work: \$250,000

Source(s) of funds: SPR and CDOT local match

Name of Project: CREATE Program Planning Support

Description of Planning Work: The City of Chicago has historically taken the lead on planning advocacy, policy development, outreach, and internal and external coordination for this large task, presenting the “face” of CREATE to a wide range of audiences. Ongoing support of proactive policy and advocacy efforts is critical to navigate this complex partnership, particularly to simultaneously keep CREATE in the forefront of both national and local policymakers and secure funding and maintain community support in an ever-changing landscape. On behalf of the CREATE partners, CDOT provides professional support services to plan for the needs of the CREATE Program and understand how to best maximize the involvement and contribution of each partner. This includes but is not limited to: technical expertise and access to freight and passenger data and information; communication experience and relationships with relevant public-sector officials and private-sector stakeholders at the

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

regional and national level; proactive and effective communication with government officials and railroad executives and their representatives.

This project will secure professional consultant services with national and local transportation planning, outreach, and communication expertise to continue to provide technical, policy, advocacy, and related support as needed to successfully achieve the goals of the CREATE Program as set forth in the CREATE Feasibility Plan (as amended) and other relevant CREATE Partner decisions. Based upon the CREATE partners' previous experience, these activities are likely to include, without limitation:

1. Support CREATE advocacy working group activities: coordinating updates and briefings with and materials for decision makers, elected officials and stakeholders; developing and maintaining website and social media content; and creating fact sheets, geographic information systems (GIS) maps, and other communications materials for public dissemination.
2. Provide specialized technical analysis, planning, research, and policy support to develop recommendations for CDOT on infrastructure planning, finance, and federal, state, and local policy regarding freight, commuter, and intercity passenger rail (including high speed rail).
3. Support the CREATE partners' relationships with other federal, state, and local transportation agencies regarding technical aspects of the CREATE Program.
4. Support the development of materials to facilitate testimony by the CREATE partners at public hearings and meetings/briefings with federal, state, and local elected officials and other stakeholders.
5. Facilitate outreach to relevant national, state, and local freight, transportation and business organizations, and other relevant communities and stakeholders to garner and/or sustain support for obtaining the resources required to successfully complete the CREATE Program.
6. Conduct assessments and research into the impacts of the CREATE Program on specific stakeholders, such as adjacent property owners, tenants, and other abutters as well as at the neighborhood, community, regional, state, national, and international scale.
7. Conduct specialized analyses and technical studies and research to advance institutional and financial support for CREATE and related initiatives.

Resulting product: See above.

Performing the work: Work will be done through a consultant team with supervision from CDOT and assistance from CREATE partners.

Time frame for completing the work: 4th Quarter 2025

The cost of the work: \$500,000

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Source(s) of funds: SPR

Name of Project: Railroad-Related Planning Support Services

Description of Planning Work: For over 100 years, the City of Chicago has been the lynchpin of the North American freight rail system. Strategically located at the junction of six of the seven largest railroads serving the continent, Chicago handles more container traffic than any single U.S. seaport – over 17 million twenty-foot equivalent units (TEU) in 2016 – in addition to more than 500 million tons of carload traffic. Chicago also serves as the Midwest hub for Amtrak’s long-distance passenger service and growing regional intercity rail network, and Metra, the second largest commuter rail system in the U.S. The needs, impacts, and opportunities of rail transportation are continually evolving, as supply chains, markets, and commuter/passenger needs change.

As rail traffic demands change over time, the impacts of railroad operations and infrastructure also change, affecting neighborhoods, air quality, noise and vibration, local traffic, and economic development and redevelopment efforts. Chicago is and will continue to be significantly affected by these trends and their impacts on the volumes and types of traffic that are handled through the region’s terminals, yards, and main lines. These trends have led and will continue to influence to a variety of responses by the major railroads, ranging from their day-to-day operations and market pursuits to long-term strategies and plans. The resulting changes will impact Chicago and the surrounding region, from the types of traffic that are handled to the use of particular facilities in the region, workforce needs, capital investment strategies, and economic development opportunities.

CDOT needs to be able to understand and plan for the needs on the rail system and the roadways and passenger facilities affected by rail traffic. This includes activities such as needs assessments for viaducts and vertical clearance improvements; identification/implementation of quiet zones; advocating and securing funding for critical rail-related infrastructure and safety projects; and leading and participating in regional efforts to improve grade crossings and other infrastructure that impacts Chicago region residents and businesses.

This project will include retaining professional consultant services with expertise in rail-related issues in Chicago to undertake a combination of potential technical and outreach activities to achieve these goals. These activities are likely to include but are not limited to:

- Data collection, technical analysis, and related research.
- Review and assessment of technical and design plans and studies related to railroad initiatives.
- Development of strategies and concepts to address identified needs.
- Grant application preparation.
- Expert review and synthesis of existing plans and studies, railroad, and other activities pertinent to the Chicago region.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

- Advising CDOT on freight and passenger rail issues and conducting technical analysis to support CDOT's decision making, planning and investment needs.
- Communication with railroads, elected officials, and related public and private sector stakeholders.

Resulting product: See above

Performing the work: Work will be done through a consultant team with supervision from CDOT and assistance from regional partners.

Time frame for completing the work: 4th Quarter 2025

The cost of the work: \$500,000

Source(s) of funds: SPR

Name of Project: Pedway Main Stem Improvement Feasibility Study

Description of Planning Work: Chicago's downtown pedestrian way system, the Pedway, lies in the heart of the city. This system of underground tunnels and overhead bridges links more than 40 blocks in the Central Business District, covering roughly five miles. Used by thousands of pedestrians each day (pre-pandemic), the Pedway connects to public and private buildings, CTA L stations and Metra's Millennium Station. The Pedway is a safe, quick, and convenient way for pedestrians to travel downtown—especially in the winter and during times of rain or snow.

Development of the Pedway began in 1951, when the City of Chicago built one-block tunnels connecting the Red Line and Blue Line subways at Washington Street and Jackson Boulevard. Since then, both public and private investment have expanded the Pedway, and the system now connects more than 50 buildings.

The purpose of this effort is to complete a concept and feasibility study to modernize and improve ADA accessibility, public awareness, structural assessment, waterproofing deficiencies, and architectural enhancements to the Pedway Main Stem. This planning phase is required to properly assess current and future needs and to help determine strategies and recommendations. Understanding ownership, governance responsibilities, and other legal considerations and relationships is a key element to being able to implement improvements.

The Pedway Main Stem extends from N. Michigan Avenue on the east to N. LaSalle Street on the west. The study area boundaries are approximately:

- N. Michigan Avenue (Eastern boundary)
- E. Randolph Street (Northern boundary)
- W. Washington Street (Southern boundary)

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

- N. LaSalle Street (Western boundary)

Work will be conducted through four primary tasks:

- Assess existing conditions and identify problems
- Goal coordination/consensus and stakeholders and public engagement
- Decision-making support for design planning and budgeting
- Strategies and recommendations

Resulting product: See above

Performing the work: Work will be done through a consultant team with supervision from CDOT and assistance from departmental partners.

Time frame for completing the work: 4th Quarter 2025

The cost of the work: \$1,000,000

Source(s) of funds: Local

Name of Project: Kinzie-Fulton Market Metra Station Feasibility (KFMMSF) Support Services

Description of Planning Work: The Chicago Department of Transportation in coordination with Metra and the Department of Planning (DPD) completed a Kinzie-Fulton Market area commuter rail station infill feasibility study in 2021. The KFMMSF study concluded that a Metra station was feasible when considering a range of future track elevations/alignments derived from Metra's Conceptual Engineering A-2 Interlocking Improvement study. The space between Ashland Avenue and Ogden Avenue was identified as the optimal station placement location. This station placement location provides a high-quality connection to CTA's #9 Ashland and #9X Ashland Express bus service and access to rapid office development occurring east of Ogden Avenue.

CDOT wishes to advance further station planning efforts, especially in areas that overlap with Metra's A-2 Interlocking improvement efforts. These planning support services include:

- Strategic planning and analysis
 - Integrating station implementation plans with concurrent related long-term initiatives; evaluating neighborhood mobility needs; refining implementation strategies; continued coordination with Metra's A2 Interlocking project; integrating external outcomes into station and station-area implementation strategies; engaging in executive-level briefings and engagement; and coordinating with and supporting city agencies related to possible private parcel acquisition.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

- Funding evaluation and strategy
 - Refining and further developing infill station funding strategies; identifying potential new funding sources or strategies; refining; and updating infill station capital and operating costs; and evaluating community benefits.
- Acquisition and implementation support
 - Continuing coordination with DPD and Metra; engaging with affected property owners, supporting land acquisition efforts (survey, 2 environmental assessment, title search, zoning evaluation, etc.); developing and evaluating mitigation strategies for impacted parcels and joint development opportunities; and tracking nearby development proposals for potential impacts to and compatibility with station area plans.

Resulting product: See above

Performing the work: Work will be done through a consultant team with supervision from CDOT and assistance from Metra and DPD.

Time frame for completing the work: 4th Quarter 2025

The cost of the work: \$500,000

Source(s) of funds: Local

Name of Project: Feasibility and Implementation Plan for Access Improvements to South Branch Parks and Neighborhoods

Description of Planning Work: The planning study will produce an implementation plan for a range of access improvements that connect the local communities and parks to existing right-of-way (ROW) and other transportation infrastructure. The project will include identifying coordinated connectivity projects for implementation, assessing the feasibility of each, developing a phased implementation strategy, articulating the economic impacts of the initiatives, and identifying funding opportunities for implementation. The scope of the planning study will focus on the "Connected Parks and Neighborhoods" chapter of the South Branch Parks Framework Plan. CDOT in close coordination with Chicago Department of Planning and Development (DPD), the Chicago Park District, and a planning consultant team will analyze existing conditions, coordinate, and reconcile goals of various public and private organizations, agencies, and stakeholders, identify options for access strategies and routes, and analyze the physical, political and economic feasibility of the options. This project will include deliberate coordination and engagement with the following stakeholders at minimum: elected officials representing the study area, City of Chicago DPD, the Chicago Park District, the South Branch Park Advisory Council, other community organizations, local businesses, and community members.

Cost of the work: \$500,000

Source(s) of funds: SPR

Name of project: Targeted Traffic Safety Behavior Change and Marketing Research

Description of planning work: This project's goal is to develop a Vision Zero behavior change marketing campaign founded in research and targeted to change driving behaviors of the people most likely to cause severe traffic crashes in Chicago – young males.

Vision Zero is a safe systems approach that aims to eliminate fatalities and serious injuries from traffic crashes. The Vision Zero Chicago initiative, in operation since 2017, is the result of collaboration between twelve city departments and sister agencies and numerous community stakeholders. This plan leverages the resources and expertise of each department and stakeholders to advance the shared goal to eliminate traffic fatalities and serious injuries on Chicago's streets by 2026.

A key strategy to achieving the City of Chicago's Vision Zero goals is changing the culture of driving in Chicago. In addition to targeted street redesigns and citywide policies that the City is pursuing, it is necessary that individual drivers adopt safer driving behaviors. Initial research indicates that only five behaviors are involved in 72% of fatal crashes. These dangerous driving behaviors are: speeding, failure to give the right of way, using a cell phone while driving, driving under the influence, and disobeying traffic signs and signals.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Cost of the work: \$250,000

Source(s) of funds: SPR

Name of Project: Comprehensive Modernization of the Pedway's Wayfinding System

Description of Planning Work: Consultants will design branding, signage, and other wayfinding elements for the Pedway and will develop a wayfinding element placement plan and design standards.

Resulting product: Signage designs, details, and placement plan report and a Pedway branding and wayfinding design standards manual.

Performing the work: Consultant Project

Time frame for completing the work: Procurement (2024), Planning & Design (2025-2026), Fabrication & Installation (TBD)

The cost of the work: \$1,500,000

Source(s) of funds: CMAQ Funds

Agency: *Chicago Metropolitan Agency for Planning*

Name of project: CMAP Regional Safety Data Project

Description of planning work: This project will include three components: a research and data analysis phase to understand the region's traffic safety issues; a series of on-the-ground pilot projects to assist local governments in identifying and implementing safety investments; and a set of tools for partners to support local efforts to improve safety through design, education, equity, and enforcement policy.

Cost of the work: \$463,000

Name of project: CMAP Equitable Engagement Program

Description of planning work: This project will utilize a consultant to co-design and implement a program to enhance engagement and participation by environmental justice communities

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

that meets the requirements of Title VI in MPO activities. The region's ON TO 2050 plan clearly identifies economically disconnected and disinvested areas across the seven-county region that have been negatively impacted by transportation plans and policies. CMAP will design a program to provide financial support to organizations representing marginalized communities to participate more fully in CMAP's federally funded planning initiatives. Participants will be selected from organizations located in jurisdictions across northeastern Illinois and will likely include but are not limited to groups representing: people of color; people with low incomes; immigrant and refugee populations; native and indigenous populations; people living with disabilities; LGBTQ+ people, youth; seniors; people who were formerly incarcerated; and Limited English Proficiency (LEP) populations. The selected consultant will process payments to program participants and monitor performance. The contract for this project is expected to be approximately 36 months in length and cover at least two years of stipend distribution. To ensure the project develops an equitable and effective engagement program, the program design phase will include an "accountability team" of external advisors that will inform, shape, and ensure accountability in the program design. CMAP's Finance and Administration department will also actively participate in project activities to validate the transaction model. Finally, a university research center will be subcontracted to conduct an independent evaluation of the program design and performance at the conclusion of the initial period of program operation.

Cost of the work: \$560,000

Source(s) of funds: SPR

Name of project: Accessible Communities

Description of planning work: The Accessible Communities program area helps local governments and agencies to improve accessibility in the region through a comprehensive program of training and education, technical assistance, and outreach and engagement. A primary goal is to ensure that transportation planning processes are conducted in accordance with all relevant requirements of Title II of the Americans with Disabilities Act (ADA) and the Illinois Accessibility Code. The program also works with government entities make their programs and services accessible for people with disabilities, with a focus on the public right-of-way.

Cost of the work: \$2,004,828

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of project: Will County 2050 Long Range Transportation Plan

Description of planning work: This project will include the following tasks:

1. An analysis of existing conditions including a multimodal systems inventory
2. A robust stakeholder engagement and public involvement plan that includes coordination with other transportation organizations including IDOT, CMAP, RTA, Pace, Metra, etc.
3. Data collection, validation, and analysis
4. A needs and gaps analysis
5. Development of future conditions alternatives
6. Identification and evaluation of transportation deficiencies and improvements
7. Equity and Environmental Justice Analysis
8. Development of recommendations for strategies and major capital projects
9. A prioritization of projects and strategies
10. Preparation of an implementation plan including funding strategies

The study will be developed with the latest data techniques and tools available, grounded in stakeholder engagement and public involvement, and in tune with emerging technologies and innovations related to project development, delivery, materials, and long-term asset management and operations. The plan will focus on priorities related to climate change, resilience, sustainability, equity and mobility of people and goods.

Cost of the work: \$1,750,000

Agency: *Counties — Cook County*

Name of project: Cook County Southwest Cook County Trucking Study

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Description of planning work: This project investigates truck mobility and investment needs in southwest Cook County, one of the major industrial and logistics clusters in northeastern Illinois. It will cover multiple suburban communities, including at a maximum Bedford Park, Bridgeview, Burbank, Chicago Ridge, Countryside, Forest View, Hodgkins, Justice, Lyons, McCook, Stickney, Summit, and Willow Springs. The Southwest Cook County area has been identified in the forthcoming Cook County Freight Plan's land use chapter as a significant industrial cluster.

The project will apply the conceptual truck routing framework developed in CMAP's O'Hare Subregional Truck Routing Study to these communities and will expand upon that work by completing detailed needs analyses. The project scope includes (1) the identification of existing locally designated truck routes and truck restrictions defined in municipal ordinances, (2) quantitative and qualitative existing conditions analyses, and (3) classification of roadway segments into tiers based on truck volumes and truck access needs, with policy and capital investment recommendations developed for each tier. While the focus of the project will be on the trucking system, highway connections to rail, air, and port facilities will be important considerations. Frequent outreach with IDOT, Illinois Tollway, CMAP, CDOT, the Southwest Conference of Mayors, West Central Municipal Conference, and municipal agencies is anticipated throughout the project.

Resulting product: Recommendations for municipalities to designate Class II and Locally Preferred truck routes, as well as to revise local truck route restrictions as needed. The result of the study will also include a prioritized list of investment needs suitable for developing future Phase I engineering studies. These recommendations will be appropriate to each tier of roadway and consistent with the Illinois Vehicle Code.

Performing the work: Consultant and CMAP staff

Name of project: Cook County Transit Study

Description of planning work: The Cook County Transit Plan will assess current and proposed public transportation services, as well as explore alternates and the potential of new services and technologies to improve service to residents and businesses.

The plan will help define what role Cook County should play in implementing the transit priorities established in Connecting Cook County, the county's long-range transportation plan. In general, Cook County's Department of Transportation and Highways has defined its regional

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

transportation niche to include playing a leadership role in those instances where an improvement with a significant economic or quality of life impact crosses jurisdictional boundaries but for which no willing candidate with capacity and expertise exists to play the leadership role.

The Cook County Long Range Transportation Plan prioritizes transit and other alternatives to driving private motor vehicles. The Transit Plan will help to define the locations and types of improvements that will provide the greatest opportunities to enhance our transportation network. This guidance will shape county policy and investments as it relates to transit improvements.

Resulting product: Cook Country Transit Plan

Time frame for completing the work: June 1, 2021

Cost of the work: \$487,500

Source(s) of funds: SPR and MFT-funded match

Name of project: Forest Preserves of Cook County's Trail System Inventory and Evaluation

Description of planning work: The Forest Preserves of Cook County proposes to conduct an inventory and evaluation of its more than 150 miles of paved trails and 200 miles of unpaved trails. This extensive system of regional trails provides transportation choices and enhances the livability of diverse communities in the state's most densely populated county. The Cook County Forest Preserves' existing system is by far the most extensive in the seven-county metropolitan Chicago region, and staff regularly receive requests to add new trail connections or improve existing trails. Forest Preserve staff are seeking answers to key questions about when the Forest Preserves' trail system will be complete and how to evaluate and prioritize maintenance and improvements.

Resulting product:

- Gap analysis by reviewing regional and sub-regional trail plans with a focus on connections to other modes of transportation;
- Recommendation of a systematic approach for regular inspection and evaluation of trail conditions, including bridges, underpasses and road crossings, and wayfinding signs;
- Development of a system of collecting user counts;
- Recommendation of equipment and software for collecting that data and a plan to incrementally apply it to the network of trails;
- Baseline data and one additional season of follow-up comparison data; and

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

- Development of a database that will allow the Forest Preserves to implement a performance-based trail maintenance and improvement program

Time frame for completing the work: September 30, 2020

Cost of the work: \$300,000

Source(s) of funds: SPR and Forest Preserve Planning match

Name of Project: Non-Motorized Counting Implementation Study

Description of Planning Work: The purpose of the Non-Motorized Counting Program Implementation Study is to produce a report for the Cook County Department of Transportation and Highways that identifies a preferred program structure for counting non-motorized users in suburban Cook County. This study will include consideration of counting technologies, counting location selection approach, inter-jurisdictional data management and sharing, equipment procurement and maintenance strategy, and anticipated program cost for the preferred program structure.

The study team will evaluate existing counting programs from regional agencies and review counting technologies and their associated costs. Next, the study team will recommend locations in Suburban Cook County to evaluate for future counting locations. These locations will reflect—and not duplicate—project partner existing and planned count locations. Finally, the study team will consider solutions for shared regional data management, potential program structures, and installation and maintenance to establish a system for a network trend count.

Name of Project: Sauk Trail Area Multimodal Path Feasibility Study

Description of Planning Work: The purpose of the Sauk Trail Area Multimodal Path Feasibility Study (STAMPS) is to analyze constraints and opportunities to develop a sidepath along a four-

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

mile segment of Sauk Trail between Central Avenue and Western Avenue in the villages of Richton Park and Park Forest. The study will evaluate alternatives for the sidepath (e.g., whether to locate the path north or south of Sauk Trail). It is anticipated that the findings of this study will inform a future Phase I engineering process.

The first of the three study tasks will address existing conditions and identify key concerns for the study area. These will include right-of-way, utilities, existing land uses, programmed and planned projects, and environmental and historical data, among other issues. Next, the study team will identify up to four alternative sidepath alignments and evaluate them based on five key factors: right-of-way impacts, access to local destinations, environmental impacts, and transportation system impacts (e.g., system connectivity, safety), and planning-level costs. Finally, the study team will produce a report summarizing the existing conditions and needs identification, the alternatives considered, and the final preferred alternative, and any needs for additional future analysis, emerging from the public engagement feedback.

Name of Project: Lake Calumet Bike Network Study

Description of Planning Work: This study will advance active transportation improvements for consideration by Cook County and municipal staff (including the City of Chicago Department of Transportation) in the area surrounding Lake Calumet area. Specifically, this effort will evaluate, plan, and identify opportunities to create a more connected and low-stress bikeway network through enhancements to existing and future (planned) on- and off-street facilities.

The study's main activities include establishing a plan vision, collecting data, incorporating planned projects from the area's jurisdictions, engaging the public, and recommending projects and bikeway program and policy strategies to advance everyday cycling. The project's public engagement will include presentations to local leaders, independent workshops, tabling at community events (i.e. pop-ups), and community-focused bicycle rides to profile neighborhood assets and bike network gaps. The study will also include multiday bicycle and pedestrian count collection and a special project focus on a new connection to the existing Burnham Greenway Trail.

Name of Project: Access Pilot Program

Description of Planning Work: The South Cook Fair Transit program / pilot has concluded and now transitioned to the Access Pilot Program. Program was launched on February 1, and includes the Access Pass. Offered by Metra, it is an income-based reduced fare program valid on all Metra lines. The pass and registration are administered by the RTA. Requirements include participation in the SNAP program. Fare discounts are approximately 50 percent and track with Metra's existing reduced fare pricing. The program is a pilot which will run through July of 2025 and is receiving \$6 million of funding from Cook County, with RTA and Metra contributing to pay for administrative costs.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Resulting product: Discounted Fare Pass for Metra passengers registered with SNAP

Performing the work: Primarily in-house staff at RTA, Metra, and Cook County, with marketing/media consulting help.

Time frame for completing the work: February 1, 2024, through July 31, 2025

The cost of the work: \$6 million contribution from Cook County, plus administrative costs paid for by RTA and Metra.

Source(s) of funds: Cook County Equity Funds, plus RTA and Metra funding

Name of Project: Chicago Regional Mobility Hubs Framework Study

Description of Planning Work: The Shared Use Mobility Center (SUMC) has been awarded 2023 Invest in Cook funding to develop a mobility hub framework. RTA is matching the IIC funding and supporting the County in managing the project with SUMC. The overall framework will be regional in scope for the entire 6-county RTA service area and include recommendations for mobility hub locations for further investigation and potential development into projects. A selection of such recommended locations will be developed into concepts for potential Phase I projects in Cook County specifically. Coordination with the service boards and other external agencies will be ongoing throughout the study.

Resulting product: Mobility Hub Framework and Policy report for the entire six-county RTA service area; and a proposed Cook County Mobility Hub Pilot Projects report.

Performing the work: Work to be completed by the Shared Use Mobility Center (SUMC), with the support of Cook County and RTA staff.

Time frame for completing the work: April 2024 through October 2025

The cost of the work: \$350,000

Source(s) of funds: Cook County Invest in Cook grant funds; RTA Community Planning grant funds.

Name of Project: Bikeshare + Transit Pilot Study

Description of Planning Work: This is a study to evaluate the feasibility of potential pilot zones for bike share expansion from Chicago and Evanston to additional suburban Cook County communities. It will leverage access to high-capacity public transit facilities, the existing and planned low-stress bike network as identified through the Cook County Bike Plan, and Forest

Agency: Counties — DuPage County

Name of Project: DuPage County Trails Count Program

Description of Planning Work: DuPage County was awarded a small IDOT SPR grant to deploy Miovision counters along DuPage, Forest Preserve and Municipal trails. 35 to 40 locations have been selected for non-motorized trail counts to be conducted by a consultant in spring and early summer, 2024. Counts will be produced and available online for all to use. Mode specific counts for pedestrian and bicycle will be produced. Project is relevant to the region in that counts will be taken near county borders allowing neighboring counties to use.

Resulting product: Specific site by site count reports, an overall count report and a GIS map of counts will result from the work. All will be available online at www.dupagecounty.gov/dot.

Performing the work: Most of the work will be accomplished by consulting engineers. Some reporting and post project posting will be done by County staff.

Time frame for completing the work: Professional Services agreement will be approved in March, Site visits will be conducted in late March, counters will be placed in April through May. Images and counts will be processed in May and June. Reports and GIS maps will be produced in June-August 2024.

The cost of the work: \$90,000

Source(s) of funds: SPR Funds, 80% federal/20% county.

Agency: Counties — Kane County

Name of Project: Kane County DOT Asset Management Plan

Description of Planning Work: In 2022, KDOT gathered an internal group comprised of section leaders and chiefs to begin working on a new approach to asset management including the development of a comprehensive asset management plan. Our current asset base includes bridges, urban and rural roadways, interconnected traffic signal networks, lighting, signs, pedestrian paths and bikeways, guardrails, open spaces, as well as two campuses, vehicles and equipment, and salt storage. Typical projects to maintain this asset base include large and small

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

bridge replacement and maintenance projects, modernization of existing intersections and roadways, culvert and storm sewer management, resurfacing, traffic safety and ADA improvements, and road and right-of-way maintenance. A rough estimate of our asset base is in the range of \$500 million.

While we have several well-functioning inventory control processes and condition assessment systems for the separate asset classes described above, we have no integrated frameworks, processes, or data systems to develop long-term strategies for maintenance and cost estimates focusing on saving taxpayers money. Moreover, with increased calls for transparency in public reporting, a comprehensive asset plan would bolster the integrity of both our short and long-term budgets and forecasts. Internal staff capacity limits our ability to develop the frameworks, processes, and data systems that could allow the further development of a comprehensive asset management plan to prioritize for the future.

Resulting product: see above

The cost of the work: \$300,000

Source(s) of funds: SPR

Agency: *Chicago Transit Authority*

Name of Project: Blue Line Capacity Study

Description of Planning Work: The Blue Line Capacity Study is a comprehensive study to evaluate and document potential capacity improvements for the CTA's Blue Line from Forest Park to O'Hare over the next 15 to 20 years.

The required tasks include examining existing capacity constraints (including the condition of existing transit infrastructure) and studying current and forecasted future market conditions and ridership trends to identify a program of recommended infrastructure and service improvements that, over both the near-term (within 5 years of the study's completion) and the long-term (within 15 to 20 years of the study's completion), will add service and increase reliability to the capacity-constrained Blue Line during peak travel periods. It will also evaluate project eligibility for the federal Capital Investment Grant Core Capacity program. The Blue Line is an integral part of the Chicago metropolitan area's transportation network, and it requires investment to continue to provide effective and affordable transit services to the region.

Timeframe for completing the work: Q4 FY 2024

Resulting product: A final project report containing an executive summary and a phased program including near-term and long-term alternatives eligible for Core Capacity funding,

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

incorporating all technical memoranda and other documentation from the various project tasks.

Source(s) of funds: Statewide Planning and Research (SPR) funding

Name of Project: Red Line Extension Project Development

Description of Planning Work: The CTA is extending the Red Line from the existing terminal at 95th/Dan Ryan station to the vicinity of 130th Street, subject to the availability of funding. In 2009, the CTA completed an alternatives analysis for the project and identified a Locally Preferred Alternative. The CTA and the Federal Transit Administration (FTA) published the Red Line Extension Draft EIS on October 6th, 2016. The Draft EIS included an evaluation of the no-build alternative and two Union Pacific Railroad (UPRR) alternative options: the East Option and the West Option. The Chicago Transit Board adopted the LPA in August 2009. In January 2018, based on public feedback received on the Draft EIS as well as subsequent project planning and engineering work, the Preferred Alignment for RLE was selected. The Chicago Metropolitan Agency for Planning adopted RLE as a fiscally constrained Priority Project in its GO TO 2040 regional comprehensive plan in 2010, and more recently as a fiscally constrained Regionally Significant Project in its ON TO 2050 regional comprehensive plan in 2018. In December 2020, the Red Line Extension entered the Project Development (PD) phase of the FTA New Starts Capital Investment Grant (CIG) program. On January 31, 2022, the FTA and the CTA published the project's Supplemental Environmental Assessment (EA) and Section 4(f) Evaluation. The Supplemental EA analyzed three project changes since the Draft EIS: 130th Street station relocation, 120th Street yard and shop refinement, and 107th Place cross-over. On August 12, 2022, the FTA and CTA, in cooperation with the Federal Highway Administration (FHWA), published the project's combined Final Environmental Impact Statement (EIS)/Record of Decision (ROD) and Final Section 4(f) Evaluation. The combined Final EIS/ROD commits to specific mitigation measures to eliminate or reduce adverse impacts and includes public and agency comments received on the Draft EIS in 2016, the Preferred Alignment announcement in 2018, and the Supplemental Environmental Assessment (EA) in 2022. The 30% Preliminary Engineering documents were completed in 2022.

Resulting product: The Red Line Extension project entered the Project Development phase of the FTA New Starts CIG program in December 2020. The project exited PD and entered New Starts Engineering in mid-2023. Funding for engineering and construction is included in the TIP.

Time frame for completing the work: The project exited the Project Development phase of the New Starts CIG Program in Q1 FY 2024.

Source(s) of funds: Federal 5307, 5339 Alternatives Analysis, 5309; CTA Bond Funds (not including UWP funds)

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of Project: Locally Led Engagement Strategy for the CTA Red Line Extension (RLE) Project

Description of Planning Work: Activities to be performed: CTA will develop a plan for local leadership on engagement (the Locally Led Engagement Strategy) for the RLE project. The plan will identify populations to target for supplemental engagement; develop strategies to meet people where they are; identify effective communication to connect with communities; recommend approaches to provide training for new Project Ambassadors to ensure that the most accurate and recent info about RLE is shared more broadly with the community; develop an approach for compensating local engagement partners; and recommend the pace/frequency of engagement efforts. The plan will support CTA's existing outreach efforts by outlining strategies to better reach people where they are, ensure broad awareness of RLE, and build community ownership in the RLE project.

Resulting Product: This project will result in a Locally Led Engagement Strategy Plan for the RLE project that would support CTA's ongoing outreach efforts.

Timeframe for completing the work: The CTA anticipates the final plan to be completed in Q4 FY 2025.

Source(s) of funds: Areas of Persistent Poverty Program 5303

Name of Project: 95th Street Corridor Equitable Transit Oriented Development (eTOD) Plan

Description of Planning Work: CTA is working in partnership with the City of Chicago Department of Planning and Development (DPD) on a comprehensive equitable transit-oriented development (eTOD) planning study along a 2-mile stretch of 95th Street between Halsted Street and Cottage Grove Avenue on the far south side of Chicago. The plan will leverage the recent reconstruction of the 95th/Dan Ryan station and planned multi-modal transit capital investments which include CTA Red Line Extension, Metra 95th Street/Chicago State University station reconstruction, and two new Pace Pulse Rapid Transit routes on Halsted Street and 95th Street. The eTOD approach encourages development that enables all people regardless of income, race, ethnicity, age, gender, immigration status or ability to experience the benefits of dense, mixed-use, pedestrian-oriented development near transit hubs.

Resulting product: Final 95th Corridor eTOD Plan to encourage equitable transit-oriented development within the study area corridor.

Timeframe for completing the work: Q3 FY 2025

Source(s) of funds: FTA Pilot Program for transit-oriented development planning; City of Chicago Department of Planning (DPD) local match funds

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of Project: Englewood Line Racine Station Restoration Project

Description of Planning Work: The Englewood Line Racine Station Restoration Project will utilize community engagement to recommend a conceptual plan to reopen the historic Green Line station to modern accessibility standards that can provide a key investment into neighborhood revitalization.

The Englewood Line Racine Station was originally constructed in 1905-06 with the South Side Rapid Transit Englewood Branch. The station operated until 1994 when it was closed for the Green Line renovation project and was not reopened. The Englewood community has expressed significant interest in reopening the Racine station to assist in the on-going revitalization projects within the area. Restoring transit access will support the economic development efforts centered around Racine Avenue and 63rd Street, which are focused on mixed use community investment, increasing quality food availability, jobs access, and affordable housing.

A modern station meeting the community desires, codes, and CTA design criteria is not feasible within the original station footprint. The station requires significant restoration and renovation to reopen to modern standards with full accessibility.

CTA has completed initial scoping studies to review options on renovating the National Register eligible station house and reconstructing the platform boarding areas. The recommendation is to construct a new modern station on the east side of S. Racine Avenue that will include elevators and escalators for full accessibility and better mobility for all users. The existing historic station house would be renovated in accordance with the Department of the Interior standards as an exit-only facility. This approach allows for the community to have a fully modern station house while maintaining the historic asset.

Timeframe for completing the work: Q2 FY 2026

Resulting product: A recommended plan will be developed into a final set of plans and renderings. A detailed construction cost estimate will be developed from the recommended station configuration. A final report will clearly outline the process, community engagement process, and recommendations to position the project for design and construction funding.

Source(s) of funds: Areas of Persistent Poverty Program 5303

Name of Project: Chicago Lakefront Corridor Alternatives Analysis

Description of Planning Work: The goal of this planning study is to determine the feasibility and appropriate level of investment for provision of high capacity, efficient, and effective transit connections in the 24-mile lakefront corridor measured from Howard Street to 103rd Street. The planning study will identify and study various poor performing segments and sub-corridors

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

in the study area and develop potential solutions utilizing street changes and/or technology to benefit the large bus transit network already in place along Chicago's lakefront.

Resulting product: The resulting product will be proposals with sufficient detail to define projects eligible and worthy for moving into further project development, or design and construction, if so warranted. The projects will contain estimated costs of construction, operations and maintenance and expected transportation and community benefits. CTA Strategic Planning is advising a consultant team and performing the work.

Timeframe for completing the work: Q4 FY 2024

Source(s) of funds: Federal 5339 Alternatives Analysis

Name of Project: Bus Priority Corridor Study

Description of Planning Work:

CTA is working with CDOT to complete a Bus Priority Corridor Study to advance planning for key bus corridors in the City of Chicago and identify concepts to dramatically improve bus service. The project will advance equity and mobility justice by enabling higher quality transit services to communities that have the greatest needs, mitigate congestion, improve air quality, and promote economic development.

CTA and CDOT will select up to five of the seventeen Better Streets for Buses corridors for further study and to identify appropriate levels of bus priority treatment. Consultant will perform high-level roadway geometry mapping, analyze bus speeds, and identify slow zones and other ridership patterns. Consultant will develop concept plans for bus priority treatments for each corridor, and support CTA and CDOT through a public outreach process to solicit feedback on the proposed designs. Consultant will then make any final revisions to the concept designs and support CTA and CDOT in advancing designs to the next phase of project definition, development, or construction.

Resulting product: Concept Designs for bus priority treatments along the selected corridors. Concept Designs will have sufficient detail to advance into further project definition and development, or engineering and construction if possible.

Time frame for completing the work: FY 2025 Q4

Source(s) of funds: \$575,000 Invest in Cook funds and \$575,000 CTA match (or additional grant fund TBD)

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of Project: Bus Priority Zone Program

Description of Planning Work: The purpose of this project, being conducted in collaboration with CDOT project development division, is to develop planning level design concepts to improve bus speed and reliability for intersections and other locations found to be central to bus delays and inefficiencies along major CTA bus corridors and advance them to implementation. This project builds on work conducted by the CTA between 2015-2020 that evaluated these bus corridors to analyze problem segments, or “slow zones”, and identified a set of potential solutions tailored specifically to each area.

Improvements considered for Bus Priority Zones include, but are not limited to redesign of intersection, dedicated bus lanes, bus queue jumps, pre-paid/ level or near level boarding, transit signal priority (TSP), optimization of traffic signals, and other transit-priority modifications. These enhancements are intended to improve bus speed, travel time, and reliability, but will also seek to improve pedestrian and traffic safety at the various locations.

CTA performed initial analysis of bus service covering the following eight corridors: 79th Street, Chicago Avenue, Western Avenue, Ashland Avenue, Belmont Avenue, Halsted Street, Clark Street, and Pulaski Road. CTA and CDOT have completed planning concepts for Chicago Avenue, Western Avenue, and 79th Street, in addition to a few locations on other corridors. Nine Bus Priority Zone projects were constructed in 2019 and 2020.

After securing additional funding, CTA and CDOT brought on a consultant team to manage the expansion of the BPZ Program in 2022. Priority zone locations and concepts within the corridors have been identified, with a phasing and implementation strategy underway.

Resulting product: The CTA and CDOT consultant team will complete an analysis of existing conditions, recommendations, planning level design concepts, identification of potential near-term improvements, and cost estimates for transit-priority improvements to the right-of-way in “slow zones” to become Bus Priority Zones along selected corridors. Future corridor analyses would result in similar final products.

Timeframe for completing the work: The final project report for 79th and Chicago Streets was completed in 2017, and construction of eight projects recommended in that report were completed in 2019, with another completed in 2020. Timeline for completing Phase II design and construction for the new corridors will be Q3 FY 2025- Q2 FY 2028.

Source(s) of funds: RTA Community Planning funding was used for analysis of Chicago Avenue and 79th Street; Federal 5339 Alternatives Analysis. CDOT received 2020 Invest in Cook funding for planning and design; CTA received SPR 2020 funding for planning of additional corridors and CMAQ 2020 funding for additional planning, design, and implementation.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of Project: Bus Vision Study

Description of Planning Work: CTA engaged Jarrett Walker + Associates as a consultant to perform a comprehensive evaluation of our bus network and service. This study reviewed current service in the context of major shifts that have taken place over the last several decades including changes in population, land use, and within the mobility industry. It took a data-driven approach to identify service inefficiencies and opportunities to restructure transit service to better serve Chicago's needs. The consultant developed recommendations to help meet the goal of maintaining, reclaiming, and growing transit ridership while increasing equity in transit service provision. This project was the first phase of an effort to re-envision CTA bus service and will be followed by a second public outreach phase that will facilitate a citywide conversation to help develop a shared vision for the future of bus service and public transit.

Resulting product: Phase 1: A final project report containing an executive summary, technical memoranda, and recommendations; Phase 2: A report summarizing the results of public outreach.

Timeframe for completing the work: Phase 1: complete Q2 FY 2024; Phase 2: FY 2025

Source(s) of funds: CTA Operating Funds and Statewide Planning and Research (SPR) funding

Name of Project: Roadmap for Transit Signal Priority (TSP) at CTA

Description of Planning Work: By modifying signal timing, TSP improves bus reliability, reduces bus bunching, and improves travel time, which improves the customer experience. TSP has become an important tool that complements other CTA bus service improvements, such as the Bus Priority Zone project and the Bus Vision Study.

CTA has collaborated with the Chicago Department of Transportation (CDOT) on TSP over the last several years implementing TSP along Jeffery Boulevard in 2014, South Ashland Avenue in 2016, and Western Ave in 2018. The existing TSP architecture, however, is becoming unreliable and obsolete. CTA and CDOT are committed to maintaining the current TSP system, but both agencies understand the need for new technology to be applied in future years as the field has advanced greatly since CTA began implementation. CTA and CDOT have been investigating centralized architecture which allow for better utilization of newer communication technology that aligns with CDOT's intersection technology plans and minimization of equipment.

CDOT and CTA were awarded one of FHWA's Advanced Transportation & Congestion Mitigation Technologies Deployment (ATCMTD) 2022 grants for a Centralized TSP Pilot Program, and CTA is now updating the original planned scope for the SPR-funded work. This ATCMTD pilot program involves using existing updated signal infrastructure that will lay out the groundwork for faster implementation of TSP at more intersections. Three corridors have already been chosen due to their interconnected network and new infrastructure.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Under the SPR grant, the original scope involved a consultant developing a Roadmap specifically for a centralized TSP architecture. CTA is now revising the scope to be more complementary with the set efforts in testing centralized TSP covered by the ATCMTD grant. After CTA's recent collaboration with CDOT on pilot test intersections for the North/Central Ashland Avenue decentralized TSP project, CTA understands how to proceed with a revised scope to improve overall TSP effectiveness with respect to the traffic signal parameters and the traffic software analysis.

Resulting product: CTA is currently revising the scope to match new needs based on the award of the FHWA grant. The consultant will provide a report to determine:

- How much TSP provides the most advantage to the buses and their customers?
- How many seconds of green time extension or red time reduction is allowed?
- How can TSP be modeled appropriately in traffic software given the various conditions?

Timeframe for completing the work: FY 2025 Q3

Source(s) of funds: \$375,000 SPR Grant

Name of Project: South Halsted Bus Corridor Enhancement Project - NEPA (Environmental Analysis) & Advanced Design

Description of Planning Work: The NEPA (Environmental Analysis) and Advanced Conceptual Design phase of the South Halsted Bus Enhancement Study built off the work completed during the initial UWP funded Project Definition phase. CTA is partnered with Pace, who is led this current phase of the project. Work included refining the proposed bus priority recommendations for the 11-mile corridor based on additional analysis, VISSIM traffic modeling, and coordination with the Chicago Department of Transportation (CDOT), the Illinois Department of Transportation (IDOT), and community stakeholders.

Proposed improvements include queue jumps at select intersections, dedicated bus-only lanes, new Pace Pulse Halsted Line and Pulse stations south of 95th Street, rehabilitation of the 79th/Halsted turnaround, and traffic signal optimization and prioritization.

As part of the environmental review process, the project included analysis and documentation of the anticipated impact on ecological, archaeological, and historic resources, air quality, and noise and vibration. In addition, Pace and CTA sought input on the proposed improvements from the Corridor Advisory Group (CAG) and the public thru public meetings.

Timeframe for completing the work: Completed FY 2023 Q2

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Resulting product: The project resulted in NEPA Categorical Exclusion documentation, advanced conceptual designs, and a project cost estimate. The project is anticipated to advance into a formal Design phase in FY 2023 Q4.

Resulting product: The project will result in NEPA Categorical Exclusion documentation, advanced conceptual designs, and a project cost estimate. The project will advance into a formal Design phase upon identification of funding.

Source(s) of funds: \$500,000 Invest in Cook Grant

Agency: Metra

Name of Project: Boarding and Alighting Counts / Targeted Station Ridership Counts

Description of Planning Work: Metra received IDOT SPR funding to complete systemwide Boarding and Alighting Counts in 2020. These counts help Metra to accurately measure current ridership, to determine the number of passengers that use each station, and to predict future ridership and trends. Systemwide counts were delayed due to COVID-19. Due to the changes in ridership and the expanded use of Metra's mobile ticketing through the Ventra app, Metra has determined that Targeted Station Ridership Counts will be a better use of resources. Accordingly, Metra and IDOT have worked to repurpose the funding for Boarding and Alighting Counts to Targeted Station Ridership Counts at select Metra stations using mobile phone counting sensors or cameras on train platforms. Devices will be set up at high ridership stations, including major destinations such as concerts, sporting events, and festivals that stress the transportation system and provide time of day estimates of station ridership. Results of the project will inform ridership demand, validate other station ridership sources, and serve as a proof of concept for emerging and innovative passenger count solutions Metra identified from responses to a 2023 Request for Information (RFI).

Resulting Products: Electronic Station Ridership Tabulations, Station Ridership Metrics, Methodology Report, Station Layout and Validation

Performing the work: Consultant TBD, Metra staff

Timeframe for completing the work: Procurement: 08/01/2024 - 01/20/2025; Completion of Work: 01/24/2025 - 01/31/2026

The cost of the work: up to \$585,000

Source(s) of funds: SPR Grant with Metra local fund match [This project is also funded with UWP funds as described in the main UWP document.]

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of Project: Systemwide Network Plan

Description of Planning Work:

The Systemwide Network Plan that will develop recommendations for medium- to long-term service changes & associated capital improvements to Metra's system that best respond to future travel markets based on estimates of ridership benefits, operating and capital costs. It will help chart the course for Metra's transition to a regional rail operator.

Resulting Products: Travel Market Scenarios, Service Plans, Ridership Modeling, Infrastructure Concept Design, Operations Simulation, Capital and Operating Cost Estimates, Evaluation and Prioritization of Proposals, Funding Strategy, Final Report, and Public Involvement.

Performing the work: Consultant team led by HNTB, Metra staff

Timeframe for completing the work: Completion by Q2 2025

The cost of the work: \$2,000,000

Source(s) of funds: FTA Formula Capital Funds

Agency: Pace

Name of project: ReVision, Pace Network Revitalization and Systemwide Restructuring Initiative

Description of planning work: Pace's Strategic Plan, Driving *Innovation* specifically mentions the need for implementing and innovating fixed-route transit in the highest demand markets, while exploring the potential to harness technology and new or enhanced mobility solutions to provide more effective coverage services in lower-demand areas.

As Pace looks to increase investments in future growth markets while maintaining its vast network of service typologies, there is a growing need to evaluate the capacity and functionality of the services provided given the agency's limited resources. Pace has contracted with Jarrett Walker + Associates as a consultant to conduct a Network Revitalization & Systemwide Restructuring of the entire Pace system. The primary goals of this initiative are to better understand current and future travel needs, to create a service standards framework to guide service investments, and to make systemwide service recommendations based on an evaluation of the market data and the service standards that are developed.

Resulting products: Develop recommended service changes as identified in the Network Revitalization & Systemwide Restructuring initiative. Plans will be implemented in phases as opposed to a single large scale service change.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Performing the work: Internal staff and consultants

Time frame for completing the work: October 2026

Cost of the work: \$1.2 million

Source(s) of funds: FTA Grant, Pace operating funds

Name of project: Pace ADA Paratransit Service and Pace Vanpool Service Customer Satisfaction Index Survey.

Description of planning work: The study is to conduct comprehensive customer survey to provide continued evaluation of service performance through the eyes of Pace ADA and Vanpool customers so their transportation needs can be met, loyalty strengthened, and ridership increased.

The required tasks include reviewing industry best practices, developing CSI survey developing sampling and survey administration plans that include both online and paper survey approaches, administering surveys and collecting data, analyzing data and generating reports and recommendations.

The findings of the project will help Pace to trend satisfaction scores from previous years to measure the increases/decreases in customer perceptions of performance and identify key areas of Pace ADA Paratransit Services and Vanpool Services for customer experience improvement, as well as generate actionable recommendations aimed at improving the efficiency of Pace services and increasing customer loyalty.

Timeframe for completing the work: May 2023 to April 2025

Resulting product: A final project report containing an executive summary and actionable recommendations and all technical dataset and other documentation from the various project tasks.

Performing the work: Internal staff and consultants

Cost of the work: \$150,000

Source(s) of funds: IDOT SPR Grant, Pace operating funds

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Name of project: I-290 Express Bus Market Feasibility Study

Description of planning work: Conduct an express bus market and facilities feasibility study for the Interstate 290 Eisenhower Expressway corridor. The project limits are between the CTA Forest Park Blue Line Transit Center branching out as a 'Y' to Oak Brook Center/Cermak-Butterfield corridor and the Schaumburg/Woodfield region. This effort includes the development of service design and facility concepts that address the transit needs of the corridor.

Resulting products: The recommendation of a short-term action plan and a long-term sustainable operating and capital plan for an express bus network situated along the I-290 Eisenhower Expressway Corridor.

Performing the work: Internal staff and consultants

Time frame for completing the work: 2nd Quarter 2025

Cost of the work: TBD

Source(s) of funds: IDOT DPT Grant, Pace operating funds

Name of Project: I-55 and Harlem Avenue Inline Bus Rapid Transit Station Phase I Engineering and Architectural Feasibility Study

Description of Planning Work: This project will result in a deliverable that assesses the feasibility of constructing an inline expressway bus transfer station along the I-55 Stevenson Expressway at Harlem Avenue (IL-43). The proposed station requires the inclusion of ADA-accessible vertical pedestrian connectivity from the expressway grade up to the bridge/street level.

To date, IDOT and Pace have partnered on the highly successful Bus-on-Shoulder Program, where Pace buses are allowed to ride on the left-side shoulder of the roadway according to an established policy, primarily during congested traffic conditions. Pace currently operates Routes 755, 850, 851, and 855 as part of this Bus-On-Shoulder Express service on I-55. Pace also anticipates implementing the Pulse Harlem Line, an arterial bus rapid transit (ART) service along this section of Harlem Avenue in the coming years. The Pulse Harlem Line will provide faster, more frequent service compared to the existing Route 307. The Harlem Line will serve multiple Pulse stations along the corridor, potentially including the bridge spanning I-55. The 2017 Pace Central Harlem Avenue Corridor Study identified the Harlem Ave and I-55 interchange as a potential location for Pulse Harlem Line stations. The placement of these Pulse stations, however, is contingent upon the feasibility of constructing a transfer facility that would allow connections with I-55 Express Bus service.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

New transfer opportunities between bus services on Harlem Avenue and I-55 would expand passenger markets and access to Pace Express Bus routes serving Downtown Chicago for western and southwestern suburban communities. The connection would also open new access for reverse commuters from Chicago and far southwest suburban residents to employment centers proximate to Harlem Avenue. This connection point would also strengthen the overall regional transit system.

Additionally, previous discussions between Pace and IDOT about a station in this location resulted in the development of preliminary plans in 2019 for future roadway improvements. These plans proposed widening the median of the expressway under the Harlem Avenue so that there could be sufficient right of way to accommodate a bus station. IDOT is also investigating rehabilitating or reconstructing the adjacent Harlem Avenue bridge over the Chicago Sanitary & Ship Canal as part of their 2019-2024 Proposed Highway Improvement Program. Both project plans shall be taken into consideration as part of this study and designs coordinated with IDOT's Office of Intermodal Project Implementation and IDOT's Office of Highways Project Implementation.

Resulting product: Bus Station Concept Report, including design concepts and cost estimates

Performing the work: Consultant to be selected

Time frame for completing the work: 2nd Quarter 2025

The cost of the work: TBD

Source(s) of funds: IDOT Technical Studies Grant

Agency: *Pace Suburban Bus*

Name of Project: Pulse Harlem Line Project Definition Study

Description of Planning Work: Through Pace's strategic vision plan, *Driving Innovation*, the agency is committed to advancing the Pulse Arterial Rapid Transit Program. Pace currently operates the Pulse Milwaukee Line and Pulse Dempster Line, and is moving forward with planning and implementation of the Halsted, 95th Street, and Cermak Lines. This project will advance the planning and definition of the sixth Pulse Line, the Pulse Harlem Line, through a Project Definition Study. The effort will result in a Project Definition Report that defines the major features and functional requirements of the Harlem Line and establishes a basis for NEPA documentation, design, and engineering activities.

The Harlem Line is anticipated to operate primarily along Harlem Avenue, with an extent to be determined. However, the extent of Pace local Route 307 (from Grand/Nordica in Chicago on the north to SeatGeek Stadium in Bridgeview on the south) will be a beginning point of

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

reference. The Project Definition Study will define the Harlem Line’s planned extent throughout those areas, including termini and intermediate station locations, as well as any proposed roadway improvements and the project’s service plan. Potential future service plans for Route 307 and CTA routes that partially correspond or overlap with the proposed Line would also be studied.

The Project Definition will capitalize on previous work completed on other Arterial Rapid Transit Program corridors as well as multiple planning studies for the Harlem corridor. The resulting plan will include service and station concepts, station siting guidelines, and functional requirements.

Resulting product: Project Definition Report

Performing the work: In-house staff collaborating with Program Management & Oversight (PMO) Consultant

Time frame for completing the work: 3rd Quarter 2025

The cost of the work: \$500,000*

Source(s) of funds: Pace operating funds

**Early estimate. This project has not been fully scoped.*

Agency: Pace Suburban Bus

Name of Project: Pulse Cermak Line NEPA and Advanced Design

Description of Planning Work: Through Pace’s strategic vision plan, *Driving Innovation*, the agency is committed to advancing the Pulse Arterial Rapid Transit Program. As the fifth Pulse Line in the system, the Cermak Line will advance Pace’s long-term vision to connect northeastern Illinois residents with employment generators, hospitals, schools, and other regional destinations. Pace anticipates completing the initial Project Definition phase of the project in 2nd Quarter 2024. This report will serve as the basis for the extent of documentation and design required for the subsequent NEPA (federally required environmental review) and Advanced Conceptual Design phase. In this phase, Pace will prepare a deliverable suitable to make Phase II (final) engineering and construction eligible for federal grant funding. The process includes not only technical study and documentation but also public outreach and meetings, as well as the ongoing involvement of a key-stakeholder Corridor Advisory Group (CAG). The CAG includes representatives from agency partners necessary for permitting and funding of the project. Advanced conceptual design drawings are intended to reflect CAG and

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

public preferences on station locations and bus priority treatments sufficient to scope Phase II engineering design.

The Pulse Cermak Line route will span 14 miles in total, traveling from the CTA Pink Line western terminus at 54th/Cermak Station in Cicero to Yorktown Center in Lombard. The Line will facilitate transfers to other important transit service, including the planned Pulse Harlem Line and CTA Route 21, which spans from McCormick Place to North Riverside Park Mall. Currently, Pace Route 322 operates along this corridor, and it will be restructured to provide complementary local service after the implementation of the Pulse Cermak Line.

The Pulse Cermak Line is expected to enter service in 2029, following the Pulse Milwaukee Line (2019), the Pulse Dempster Line (2023), the Pulse 95th Street Line (expected 2027) and Pulse Halsted Line (expected 2028).

Resulting product: Depending on the Class of Action Determination by the Federal Transit Administration, Pace expects to complete a Documented Categorical Exclusion report, including all required attachments and exhibits, along with advanced conceptual design drawings for proposed station sites and roadway and geometric improvements.

Performing the work: In-house staff collaborating with Program Management & Oversight (PMO) Consultant

Time frame for completing the work: 3rd Quarter 2026

The cost of the work: \$1.5 Million*

Source(s) of funds: Pace operating funds.

**Early estimate. This project has not been fully scoped.*

Agency: RTA

Name of Project: Community Planning Program

Description of Planning Work: The RTA's Community Planning program provides funding and planning assistance to communities for planning projects that benefit local communities and the regional transit system. Community Planning offers local governments an opportunity to participate in the planning of local transportation, transit, and transit-related opportunities. Services offered include the creation of transit-oriented development plans, transit neighborhood mobility plans, transit corridor plans, mobility hubs, curb management studies, TOD zoning ordinances, developer discussion panels and special funding districts.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

A total of 13 projects are currently active all of which are not utilizing UWP planning funds. The RTA is conducting a new Call for Projects in 2024, which is expected to result in up to 10 new projects. Active projects include:

1. Chicago Transit Authority Bus Priority Zones Plan - Halsted Street
2. Maywood TOD Zoning Code Update
3. Robbins TOD Zoning Code Update
4. Village of Homewood Transit-Oriented Development Plan
5. Village of LaGrange Transit-Oriented Development Plan
6. Village of Richton Park Transit-Oriented Development Plan
7. Pace-Far South Halsted Corridor Study
8. Village of Sauk Village Corridor Study
9. Equiticity
10. Mobility Hub Concept Plan Development
11. City of Geneva Special Financing District
12. City of Joliet Equitable Transit-Oriented Development Plan
13. Village of Riverdale Mobility and Transit-Oriented Development Plan
14. Village of University Park Special Financing District

A complete list of all past and current Community Planning projects may be viewed at <https://rtams.org/transit-projects-and-studies>

Resulting Products: The resulting product will be finalized plans/zoning codes or recommendations that are either adopted by the governing body of the grantees or used to further implementation.

Performing the work: Consulting teams, under the direction of RTA grantees and/or RTA staff, are responsible for completing the work.

Time frame for completing the work: The thirteen projects listed above are expected to be completed by July 1, 2025.

The cost of the work: \$1,451,000.

Source(s) of funds: RTA; local match

Name of Project: RTA Strategic Asset Management (SAM) Work

Description of Planning Work: Beginning in 2019, staff utilized COST for analysis of various levels of capital investment funding to assist regional efforts towards obtaining increased State and Federal capital funding. To update the COST asset database from the existing 2015 data, staff compiled the Service Board NTD asset data submittals beginning in 2020 incorporating revenue vehicles and equipment. In 2023, facilities and infrastructure assets will be updated

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

with completion of the update of the COST database in 2024. Staff will continue to update the COST database and utilize COST for ongoing requests/queries from internal clients and to inform planning efforts for the SAM work, including capital budget performance measures. The COST tool is a legacy product and has numerous inefficiencies and complexities in its data structure, coding, and optimization routines. A consultant has been engaged, and in 2023 will assist staff and review the structure of COST for improved data updates and scenario analysis.

Resulting Products: Data updates to COST model and analysis of funding on Transit condition.

Performing the work: RTA staff will be responsible for performing this work.

Time frame for completing the work: Ongoing, Completing in Spring 2025.

The cost of the work: \$300,000

Source(s) of funds: RTA

Name of Project: Regional Analysis Tool Development and Maintenance

Description of Planning Work: RTA staff will continue to maintain and update two key regional analysis tools: the regionally calibrated STOPS model and the Transit Access Measure. For the STOPS model, staff will develop an approach to updates STOPS trip tables, transit ridership and schedules, and incorporate expected updates by FTA to the model. For the Transit Access tool, a software platform will be acquired that will allow for improved analysis. Work will include seeking input from internal and external contributors on tool development and processing of output data for project evaluation, performance measurement, and other applications.

Resulting Products: Updated tools available for regional transit planning applications

Performing the work: RTA staff will be responsible for performing the STOPS model work. External consultants and/or partners will be sought for the Transit Access tool update.

Time frame for completing the work: Ongoing through 2024.

The cost of the work: \$200,000

Source(s) of funds: RTA

Name of Project: Human Services Transportation Plan Update

Description of Planning Work: The FTA requires that projects selected for funding under the Section 5310 program be “included in a locally developed, coordinated public transit-human

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

services transportation plan” and that the plan be “developed and approved through a process that included participation by seniors, individuals with disabilities, representatives of public, private and nonprofit transportation and human services providers and other members of the public.” A locally developed, coordinated public transit-human services transportation plan (HSTP) identifies the transportation needs of individuals with disabilities, seniors and people with low incomes; provides strategies for meeting those local needs; and prioritizes transportation services and projects for funding and implementation. The RTA last updated the HSTP in 2021 and, in an effort to keep the HSTP in line with current trends and needs, the RTA is embarking on the process to update the HSTP, with an estimated completion date and RTA Board adoption in December 2025.

Resulting product: The resulting product will be a final report incorporating an inventory and assessment of existing transportation providers, identification of additional and emerging mobility needs and gaps and strategies and activities to address those needs and gaps.

Performing the work: A consulting firm will be responsible for completing the work.

Time frame for completing the work: Project will commence in Fall 2024 and complete by December 31, 2025

The cost of the work: estimated \$250,000

Source(s) of funds: Federal Section 5310 Funds (100%)

Name of Project: Transit Friendly Communities Guide

Description of Planning Work: The result of this collaborative planning effort will be a regional policy and planning document for communities that host existing or future transit services. The document will provide useful tools and standards to help make land-use decisions that improve access to transit to ensure that our riders and the residents of those communities can travel safely and efficiently. The guide will also provide insight on what transit services are available throughout the region. Recommendations will build off a similar guide completed in 2012, [Setting the Stage for Transit](#), but revise and expand based on changes in the access, mobility and land development landscape in the past 10+ years. This includes the prevalence of transportation network companies (TNCs), micromobility options, and countywide dial-a-ride systems.

Resulting product: A report / guide to be utilized by municipalities and counties to guide their land use decisions.

Performing the work: A consulting firm will be responsible for completing the work.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Time frame for completing the work: Project will commence in February 2024 and complete by December 31, 2025.

The cost of the work: \$138,000

Source(s) of funds: 100% RTA funding.

Name of Project: Transit Climate Action Plan

Description of Planning Work: The RTA will develop a regional transit climate action plan that builds upon existing and emerging Service Board plans and identifies strategies to accelerate the transition to a zero-emission regional transit system. The plan will identify ways in which the transit system can support the region's climate action goals and develop metrics to illustrate the inherent sustainability of transit in urbanized regions. The plan will focus on the metrics used to quantify the climate impact of the RTA's transit system, particularly as compared to personal vehicles, and will develop a toolbox of RTA advocacy and public campaign talking points which the RTA will use when advocating around State and Federal legislation, and more broadly with climate messaging to the region's public. The plan will serve as a guide as the RTA charts a course to reduce the emissions footprint of the transportation system and move towards zero-emissions for transit operations in a manner that is equitable and prioritizes communities most burdened by poor air quality.

Resulting product: A final report including actionable recommendations.

Performing the work: A consultant team will complete the scope of work.

Time frame for completing the work: Project is expected to begin in Summer 2024 and complete in Summer 2025.

The cost of the work: TBD

Source(s) of funds: 100% RTA Funding

Name of Project: Transit Information for Riders Review

Description of Planning Work: This Travel Information for Riders study will identify various ways to improve customer information provided during a transit trip in the Chicago region on CTA, Metra, and Pace. For our regional transit system to work seamlessly, information must be consistent across the service providers. Stakeholder working groups made clear that communications improvements were needed before, during and at the end of trips. Customers riding each Service Board should feel comfortable using other Service Board services in terms of real time information provided at the station; on buses and trains; signage identifying service;

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

and audio/visual information. This study will identify a set of low-cost improvements that can be quickly implemented with limited infrastructure as well as identifying potential long-term investments. These improvements will also help support communities' efforts to improve the area around their transit stations/stops.

Resulting product: a report that includes coordination opportunities for Service Board customer information and an action plan that identifies immediate changes that can occur.

Performing the work: A consultant team will complete the scope of work.

Time frame for completing the work: Project will start in Spring 2024 and complete by December 31, 2025.

The cost of the work: \$280,000

Source(s) of funds: 100% RTA Funding

Name of Project: 2025 Customer Satisfaction Survey

Description of Planning Work: Electronic and onboard surveying of transit riders

Resulting product: Reports and transit rider demographic data

Performing the work: Consultant

Time frame for completing the work: September 2024 – August 2025

The cost of the work: \$600,000

Source(s) of funds: local

Name of Project: Regional Transit Economic Impact Analysis

Description of Planning Work: This planning study will utilize travel demand and economic modeling to understand impacts the transit system has on the region in terms of economy and climate. This study builds upon work completed during development of the current strategic plan and will articulate two potential scenarios 1) a reduced transit system that remains absent sustainable funding and 2) an expanded transit system with sustainable investment.

The study will provide:

- Better information on the changes to the transit network that would be needed to close the funding gap.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

- Better understanding of the public's response to those transit network changes.
- Better understanding of the economic impacts to the region from those travel changes.
- Better communication of results.

Resulting product: Third part published report, talking points, and communications products

Performing the work: Consultant

Time frame for completing the work: November 2023 – October 2024

The cost of the work: \$205K

Source(s) of funds: RTA funded

Agency: *Village of Oswego*

Name of Project: Oswego Pavement Condition Survey & Asset Inventory Collection

Description of Planning Work: Conduct a pavement condition survey to aid in the update of a multi-year maintenance program. We last conducted a pavement survey in 2014. The survey will allow for benchmarking against other communities. We will also collect information on the following assets: ADA ramps; signs and supports; pavement markings; and traffic signals. This data will establish a base inventory for an asset management program. Development of an asset management program is included in the Village's Strategic Plan adopted in 2022.

Resulting Products: See above

The cost of the work: \$117,500

Source(s) of funds: SPR

Agency: *Village of Oak Park*

Name of Project: Vision Zero Oak Park

Description of Planning Work: Vision Zero Oak Park is the Village of Oak Park's strategy to eliminate all traffic fatalities and severe injuries, with a focus on cyclists and pedestrians, while increasing safe, healthy, equitable mobility for all, by the year 2035. The ultimate product of the project will be the final Vision Zero Oak Park plan document. The project will be accomplished by progressing thru the following high-level components:

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

1. Educate Village Transportation Commission, staff, residents, and stakeholders on Vision Zero fundamentals;
2. Establish and foster a culture of safety throughout the process and collaborate with diverse safety stakeholders, including engagement with the public at open houses to incorporate their experiences and needs;
3. Use a data-driven process to assess the Village's traffic safety situation, including a focus on cyclist and pedestrian volumes and crashes at key locations;
4. Build common understanding of challenges and opportunities; and
5. Develop a strong action plan, including performance measures, targets, strategies, and countermeasures.

Resulting Products: See above

The cost of the work: \$150,000

Source(s) of funds: SPR

Agency: *Village of Hoffman Estates*

Name of Project: Village of Hoffman Estates Comprehensive Multimodal Transportation Plan

Description of Planning Work: The project seeks to build on existing pavement condition reporting methods within the Village to create a unified approach to asset management, to include transit and bike/pedestrian assets. From there, the plan will build on existing recommendations within the Village's 2010 Comprehensive Bicycle Plan, various local sub-area plans, IDOT's Long Range Transportation plan, and other local and regional plans to recommend new opportunities for transportation and connectivity throughout the Village. Key focus areas for the plan will be new approaches to last-mile connectivity, complete streets and universal design implementation, and connectivity to major employment sites within the Village, such as the Bell Works "metroburbs," with a focus on those areas with greatest need, and the connection of historically disadvantaged areas to job opportunities.

The Village will utilize the plan, and the performance-based implementation steps it recommends, to seek further partnerships and grant opportunities to strengthen the Village's transportation network.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Agency: Village of Mount Prospect

Name of Project: Arterial Bike Network Study

Description of Planning Work: This project includes a planning study to gather existing conditions, evaluate alternatives, develop cost estimates, and prioritize future projects for bicycle infrastructure along 14 arterial roadways. Initial work will include performing site surveys, data collection (along routes, bus stops, schools, parks, train stations), and interviews/coordination with key stakeholders such as IDOT, Cook County, Pace, Metra, and Union Pacific Railroad. Additional tasks would include a comprehensive alternatives analysis for each route, roadway lighting evaluation for each route, cost estimates for the various engineering phases, identification of funding sources, and a prioritization schedule to complete the bike network.

Resulting Products: See above

The cost of the work: \$350,000

Source(s) of funds: SPR

Agency: City of Joliet

Name of Project: I-80 Land use Planning Study

Description of Planning Work: This Community redevelopment plan is to be developed as one of the Environmental Justice commitments resulting from disproportionate impacts to the minority community bordering the I-80 bridges over the Des Plaines River. In coordination with the City of Joliet and with input from the community, the following scope of work describes the development of a conceptual redevelopment plan for the remaining unused land that will remain following demolition of the existing I-80 bridges. This redevelopment plan will detail needed zoning/land use or other policy changes that Joliet would need to implement, potential redevelopment opportunities, and detail how land is to be transferred in accordance with state statutes and local requirements that may apply. Task 1 - Community Vision and Goal Development - review existing documents to determine a draft vision and goal to ensure this plan coincides with existing plans. Task 2 - Community Needs and Prioritization - determining the community's connectivity needs. Task 3 - review and market assessment of vacant parcels and production of redevelopment alternatives at the conceptual level. Task 4- producing a planning level cost estimate and a list of short- and long-term improvements that is fiscally constrained. Task 5 - presenting the final recommendations to the community and developing a draft and final redevelopment report.

Resulting Products: See above

Agency: *City of Calumet City*

Name of Project: Calumet City: PEL Feasibility Study for (Full Interchange) Dolton Rd/I-94

Description of Planning Work: This project includes completing a Planning and Environmental Linkage (PEL) Feasibility Study for a full interchange at Dolton Road and Interstate 94 within the corporate boundaries of Calumet City (Dolton Road is Minor Arterial). An interchange's PEL Feasibility Study is needed to examine whether a full Interchange is warranted to economic growth of the Calumet Region, improvement to the quality of life, and safety improvements. The Study is needed to better determine and define project impacts. The proposed project will investigate several interchange alternatives to establish the feasibility of each geometry. A key purpose of this Interchange Feasibility Study is to eliminate alternatives that do not meet the purpose and need of the project.

Agency: *Central Council of Mayors / West Central Municipal Conference*

Name of Project: Regional Complete Streets & Green Infrastructure Master Planning

Description of Planning Work: The Central Council of Mayors plans to provide a regional, community-based approach to planning for Complete Streets and Green Infrastructure projects. The purpose of this study will analyze each community and, with community input, develop a customized approach towards identifying projects and locations that would be ideal candidates for Complete Streets and Green Infrastructure.

The final product of this effort will result in a planning document that outlines suggested guidelines for development standards, ordinance suggestions, targeted infrastructure projects in each community, and future considerations needed to embrace these design concepts.

Agency: *South Suburban Mayors and Managers Association*

Name of Project: Calumet Triangle Corridor Planning and Research Study

Description of Planning Work: The Calumet Area Triangle, defined by the Northeast quadrant formed by I-80 and I-94 is comprised of commercial districts of neighboring communities of South Holland, Calumet City and Lansing. The project will consist of reviewing and assessing existing conditions; conducting a corridor travel market analysis, completing a corridor transportation facilities capacity analysis, completing a corridor land use compatibility analysis, identifying a set of feasible Transportation Improvements based on the Complete Streets Concept and AASHTO Roadway Design Principles and Best Practices.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Agency: University of Illinois Chicago

Name of Project: Connecting Harvey to Joliet/Monee. Building People & Freight Connections in the Logistics Cluster anchored by the I-57/I-294 Interchange. Connecting People to Work & the Middle-Mile Strategic Logistics Plan

Description of Planning Work: The Chicago Southland Economic Development Corporation and the City of Harvey, sponsored by the Urban Transportation Center at UIC will study I-57/I-294/I-80 Logistics Cluster located in the municipalities of Harvey, Markham, Country Club Hills, Matteson, Hazel Crest, Posen and Dixmoor to produce strategies to enhance multimodal access for people who work in the Cluster and related development and facilitate efficient movements of freight generated at the sites. The project team will work with RTA to explore synergies between the TOD plan effort and the proposed transit connectivity improvement between the origin cluster in the Southland and the destination cluster in Monee and Joliet for Amazon. A Middle-Mile Strategic Logistics Plan will be developed with input from logistics businesses in the area. A master report will be delivered to provide site-specific as well as comprehensive strategies to maximize economic growth in the study area, connect people to new jobs that will be created by the Cluster and related new developments and address the middle-mile logistics challenges.

Agency: Village of Homer Glen

Name of project: Homer Glen Comprehensive Transportation Plan

Description of planning work: The Village of Homer Glen is looking to update its transportation plan which was previously adopted in 2007. The new study will build on and update the existing plan, evaluate pavement conditions, analyze current ADA compliance, and explore options to continue expansion and interconnection of bicycle and multiuse paths throughout Homer. The village will partner with an engineering consultant to acquire and analyze data.

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Agency: Village of Schaumburg

Name of project: 90N District Transit and Micromobility Study

Description of planning work: Building off the completion of the 90N Transit Access Study, the Village of Schaumburg is seeking funds to complete a transit and micromobility study for the 90N District. The 90N District currently has access to several regional transit routes and the Woodfield Trolley, however the village recognizes that to deliver the 90N District goal of creating a true multimodal district, that transit and micromobility solutions will be an essential part of the transportation network. This study would evaluate how to develop the alternative transportation network to connect residents, employees, and visitors for the first/last mile of their trip. This study will consider available microtransit and micromobility solutions that can be deployed within the 90N District and will evaluate which solutions are best suited to the needs of the district. The project scope will include an analysis of how best to integrate proposed microtransit and micromobility solutions with existing local and regional transit solutions in the 90N District. The study will also include the development of an implementation plan that will allow the village to phase in the delivery of a cohesive and complete multimodal transportation network as the 90N District continues to develop.

Source(s) of funds: SPR

Agency: City of Waukegan

Name of project: Sheridan Road/IL 137 Feasibility Study

Description of planning work: The Sheridan Road/IL 137 feasibility study will look at ways to improve community connectivity, enhance public transit connections and bicycle and pedestrian mobility, improve safety for all roadways users, and promote economic development through transportation investment in an area of poverty and two historically disadvantaged communities in the cities of Waukegan and North Chicago. The City of Waukegan is the lead agency for this application, but it the project is a partnership between the two communities working towards a common goal. The location of the feasibility study is the Sheridan Road/IL 137 Corridor from Greenwood Avenue (northern terminus) to the Great Lakes Naval Station, just south of Buckley Road (southern terminus). Running for approximately 5.8 miles, Sheridan Road/IL 137 (including the Amstutz Expressway and the Bobby E. Thompson Expressway) in its current configuration creates an inequitable, development prohibitive barrier between downtown Waukegan, downtown North Chicago, and recreational amenities at Lake Michigan, and the surrounding neighborhoods located west of these roadways. The Cities of Waukegan and North Chicago are seeking funding from IDOT's SPR Program to conduct a

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

feasibility study to help determine the appropriate transportation solutions for this corridor that will address historical inequities and promote safety, mobility, and accessibility for all corridor users.

DRAFT

Proposed FY2025 Unified Work Program (UWP) for Northeastern Illinois

State Fiscal Year (July 1, 2024 – June 30, 2025)

Appendix G: UWP development, monitoring, and reporting processes

The UWP lists the planning projects CMAP and other agencies undertake each year to enhance transportation in northeastern Illinois and to fulfill federal planning regulations. The UWP is designed to run in conjunction with the State of Illinois fiscal year timeline of July 1 to June 30. The final UWP document includes the transportation planning activities to be carried out in the region, detailing each project's description, products, costs, and source of funding.

The UWP Committee develops a program for recommendation to the [MPO Policy Committee](#) and the [CMAP Board](#). The eight voting members of the UWP committee are 1) the City of Chicago, 2) CTA, 3) Metra, 4) Pace, 5) CMAP, 6) RTA, 7) the Regional Council of Mayors, and 8) one representative from the six collar counties. IDOT chairs the committee and votes in instances of a tie. Non-voting members include IEPA, FHWA, and FTA. Member agencies of the UWP Committee traditionally receive UWP funding, but any other MPO Policy Committee agencies can submit proposals or sponsor submissions from other entities.

In October 2023, the UWP Committee established the CMAP [Unified Work Program Development Methodology](#). The methodology establishes the schedule and process for the development and active program management of the UWP. The methodology will be reviewed annually by the committee to determine if any adjustments to the policies, procedures, or methodology are warranted prior to the opening of the next call for projects cycle. This periodic review ensures that the methodology remains aligned with federal and state requirements and the goals and objectives of the region.

The sources of federal planning funds allocated through the UWP are the FHWA and the FTA. The FY25 UWP awarded \$27.5 million in federal funding, along with the required 20 percent of local matching funds, resulting in approximately \$34.3 million being dedicated to transportation planning in northeastern Illinois.

Quarterly progress reports for planning activities funded through this and past UWPs can be found on CMAP's website: <http://www.cmap.illinois.gov/unified-work-program>.
