MEMORANDUM

From: CMAP Staff

Date: January 6, 2026

Subject: New eTIP Platform

Action requested: Information

CMAP has launched a [new, modernized eTIP website](#) that improves public access to information about transportation projects across northeastern Illinois. The [Transportation Improvement Program \(TIP\)](#) is the region's agenda of roadway, transit, and active transportation investments expected to move forward in the next five federal fiscal years, including all federally funded projects and regionally significant non-federal projects. The redesigned eTIP site offers clearer insights into where projects are located, how they are funded, and when they are scheduled — strengthening transparency and understanding of how transportation investments advance regional priorities and align with the [ON TO 2050](#) regional plan.

The new eTIP platform features an interactive map, expanded search tools, and downloadable data that allow users to explore more than 2,000 active projects. Members of the public, local partners, and stakeholders can filter information by geography, project type, funding source, and year, making it easier to see what is happening in your community and across the region. The site also provides direct access to TIP amendments, key project documents, and public comment opportunities — ensuring both residents and transportation partners stay informed and engaged throughout the programming process.

For more information about the eTIP and how to use it, please contact Sarah Stolpe (ssolpe@cmap.illinois.gov).
