Regional Climate Action Plan

ACTION REQUESTED: Discussion

PURPOSE & ACTION: CMAP and the Metropolitan Mayors Caucus have kicked off regional climate action planning work in response to and with funding support from the USEPA Climate Pollution Reduction grant program. The work is also supported by a grant from the Department of Energy Clean Energy to Communities (C2C) program, and includes a partnership with Oak Ridge National Laboratory, the Respiratory Health Association, and ComEd. Staff will discuss components of the Priority Climate Action Plan, provide updates on the CPRG Phase 2 Implementation grant applications, and provide an overview of the upcoming Comprehensive Climate Action Plan, including the new GHG inventory and the stakeholder engagement process.
