IDOT's Long Range Transportation Plan: Move Illinois

ACTION REQUESTED: Information

PURPOSE & ACTION: The Long-Range Transportation Plan (LRTP) is a comprehensive and strategic plan that outlines transportation goals, objectives, and planned investments over an extended time frame, usually spanning 20 to 30 years. It is designed to address the various needs of Illinois' extensive transportation network, which encompasses highways and bridges, airports, public transit, rail freight, rail passenger systems, and more. The LRTP serves as a guiding document for policymakers, transportation agencies, and stakeholders to aid in decision-making, funding allocation, and project prioritization. IDOT is in the process of updating the LRTP and will provide a status on the plan.
