Regional Climate Action Plan

ACTION REQUESTED: Discussion

PURPOSE & ACTION: CMAP and the Metropolitan Mayors Caucus have kicked off regional climate action planning work in response to and with funding support from the USEPA Climate Pollution Reduction grant program. The work is also supported by a grant from the Department of Energy Clean Energy to Communities (C2C) program, and includes a partnership with Oak Ridge National Laboratory, the Respiratory Health Association, and ComEd. Staff will discuss components of the climate action planning process and surrounding context, including establishing a greenhouse gas performance measure.
